

# Akvelon Inc.

## Position: Middle UI/UX Designer

### About us

**Akvelon Inc. (USA)** works in the field of software engineering based on a variety of technologies. Our company is a member of the vendor program, which gives employees the opportunity to work with clients in the United States and other countries (**Microsoft, Facebook, Airbnb, Dropbox, Pinterest**, and many others). This is a great opportunity to learn from and work with leading engineers of world-renowned companies.

### About project

The project is a dynamic and innovative company spun off from a leading health insurance broker. Their mission is to revolutionize the way employee healthcare benefit data is reconciled, transitioning from manual processes to an automated, scalable solution. The software aims to serve not only our current clients but also other health insurance brokers and beyond. Given the nature of our work, HIPAA compliance is a top priority.

The client is seeking a Middle UI/UX Designer with strong understanding of UX design principles and requirement analysis to join their agile team. The ideal candidate will have experience interacting with frontend teams and will be comfortable working in an agile environment.

### Responsibilities

- Create wireframes, prototypes, and high-fidelity designs using Sketch/Figma
- Gather and analyze requirements from stakeholders to define design specifications
- Collaborate with frontend developers to quickly iterate on designs and adapt to feedback
- Ensure all UI/UX design activities adhere to HIPAA compliance requirements
- Participate in agile development processes, including sprint planning, daily stand-ups, and retrospectives

### Work Schedule

- To ensure a minimum overlap with the Pacific Standard Time (PST) zone, availability is required between 9:00 AM and 11:00 AM PST

## Requirements

- Strong experience with tools such as Sketch, Figma, Adobe XD, or similar for creating wireframes, prototypes, and high-fidelity designs
- Deep knowledge of user-centered design methodologies and best practices
- Ability to quickly iterate on designs and adapt to feedback
- Experience in conducting user research, usability testing, and interpreting data to inform design decisions
- Experience in creating and maintaining comprehensive design documentation including style guides and design systems
- Strong understanding of agile methodologies and practices
- Excellent communication skills to articulate design decisions and rationale clearly to both technical and non-technical stakeholders

## Nice to have

- Experience with HIPAA compliance in software development
- Basic knowledge of HTML, CSS, and JavaScript to effectively communicate with developers and understand technical constraints

## Our benefits

- Paid vacation, sick leave
- Official state holidays
- Professional growth while attending challenging projects and the possibility to switch your role, master new technologies and skills with company support
- Flexible working schedule: 8 hours per day, 40 hours per week
- Personal Career Development Plan (CDP)
- Employee support program (Discount, Care, Heals, Legal compensation)
- Paid external training, conferences, and professional certification that meets the company's business goals
- Internal workshops & seminars
- Relocation support
