Most Important:

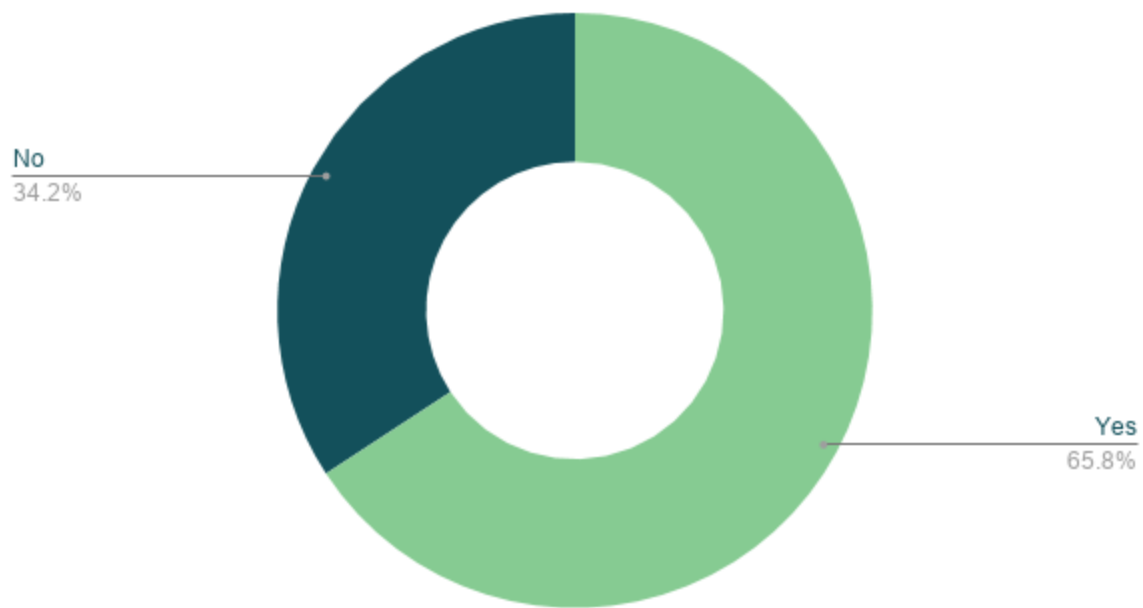

**Layout
Compatibility**

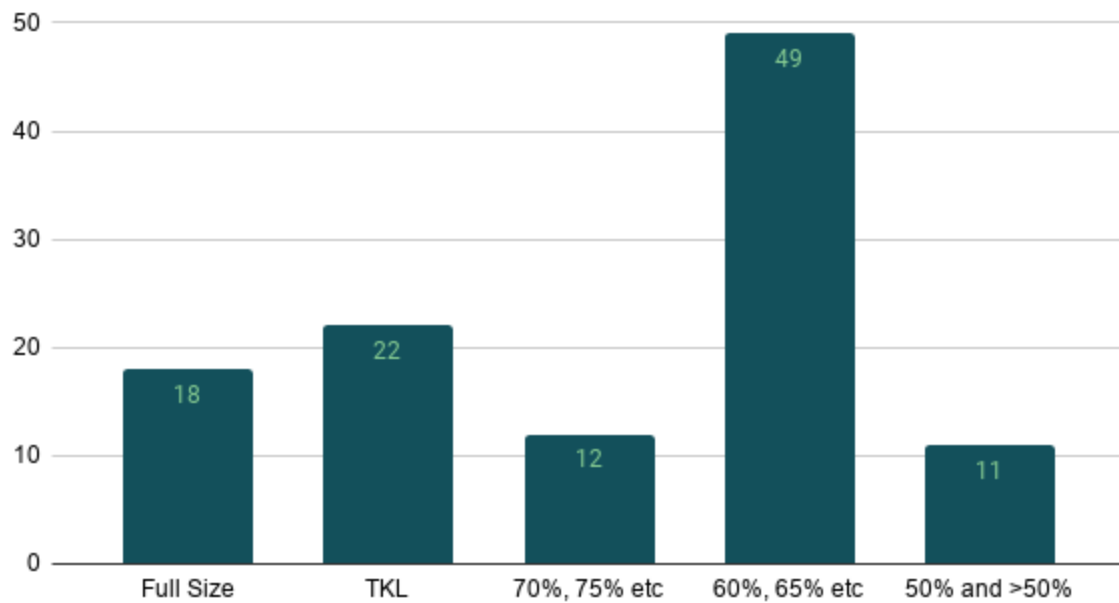

Least Important:

**HHKB, WKL and
Other Blockers**

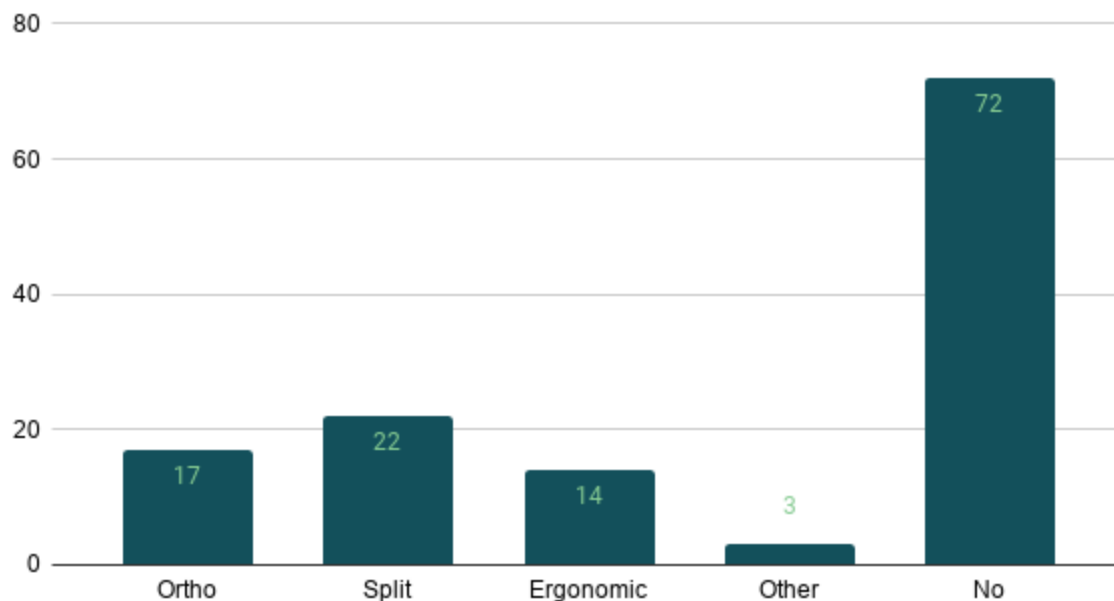

Are Keyboard Kits Currently Too Expensive?

What is Your Preferred or Most Used Layout?

Do you use any other diverse layouts?

More Info:

The survey took 3 days to reach the target sample size of 100, although the total respondents ended up reaching 112.

I am going to use the survey data to compare with another dataset filled with keyboards data such as chassis and plate material, layout, PCB features and unique designs. The data contains over 250 individual boards which either released or published an interest check in 2020. Keyboard data was collected from Geckhack, Reddit, zFrontier, Deskthority, Keebtalk and keyboard designer/manufacturer websites.

If you want to use the data or have any other questions, please feel free to message me.
