## Learning Opportunities - 6th Grade

Use the access codes below to join each virtual classroom. Once inside the classroom, look for the learning opportunities checklist for a specific guide and weekly breakdown. We have provided a weekly breakdown in an attempt to provide as much guidance and structure as possible.

However, these are not hard deadlines and students are not required to complete the learning activities before the final date each week.

Students are encouraged to progress at their own pace and based on teacher feedback with long-term flexibility given as needed.
