

Meta Title: Emsella Charleston SC | Treat Urinary Incontinence

Primary KW: Emsella

Meta Description: Don't let urinary or stress incontinence hold you back! Emsella in Charleston, SC, helps you overcome incontinence so you can live life to the fullest.

H1: Emsella in Charleston, South Carolina | Overcome Urinary & Stress Incontinence

Do you suffer from urinary incontinence? Do you feel self-conscious or embarrassed about the condition? Well, the good news is that you needn't suffer anymore. There is a safe and effective solution that can help you regain control over your bladder—introducing Emsella. This non-invasive, pain-free, and quick treatment for urinary incontinence. Emsella uses electromagnetic technology to stimulate pelvic floor muscles. Treatments strengthen the muscles and improve bladder control.

Body Rejuvenation Institute is committed to helping our patients live their best lives with Emsella. **We are proud to be the primary EMSella provider in Charleston, South Carolina.** Discover a newfound sense of confidence that comes with improved bladder control. Take control of your body and life by contacting us at 843-856-9669 to schedule your consultation.

H2: Benefits of Emsella

The muscles in the pelvic floor support the bladder, uterus, and rectum. When these muscles weaken due to aging, childbirth, or other factors, it can lead to urinary incontinence. Emsella offers a range of benefits that make it a popular treatment for urinary incontinence. These benefits include:

- Improved bladder control
- Reduced symptoms of urinary incontinence
- Comfortable, hassle-free treatments
- Requires no incisions or anesthesia
- Quick, convenient sessions
- No downtime required

H2: How Emsella Works

Urinary incontinence is a common and often distressing condition affecting millions. It can lead to embarrassment, a lack of self-confidence, and feelings of isolation. If you suffer from urinary incontinence, you may have tried various treatments or remedies with little to no success. Emsella is a life-changing treatment that can help you regain control over your bladder and live your best life.

Emsella uses electromagnetic waves to stimulate the pelvic floor muscles. The treatment consists of a series of 30-minute sessions. During each session, the patient sits fully clothed on the Emsella chair. The chair emits high-frequency electromagnetic waves to the pelvic floor muscles. The waves cause the muscles to contract and relax, similar to performing Kegel exercises. This process strengthens the pelvic floor muscles and improves bladder control. The treatment consists of 30-minute sessions, and no downtime is required. So you can get back to your daily routine immediately after the treatment.

H2: Emsella Results*

Emsella offers results in just a few weeks after the treatment. Most patients experience improved bladder control and a reduction in symptoms of urinary incontinence within the first few sessions. The full results can be seen about three months after the treatment. As always, results will vary.*

H2: Emsella Aftercare

After your treatment with the Emsella chair, you may experience some mild soreness or tenderness in the pelvic area. This is normal and should ease up within a few days. We recommend staying hydrated. Moreover, you should get plenty of rest to help your body recover after each treatment session.

H2: Choose the Emsella Experts at Body Rejuvenation Institute

At Body Rejuvenation Institute, we understand that each patient has unique needs. We're not satisfied with just "good enough." We go above and beyond to guarantee our patients receive the highest quality care that meets their specific needs and exceeds their expectations.

Don't put your life on hold! Say goodbye to those embarrassing leaks and reclaim your confidence. Contact us at 843-856-9669 to schedule your Emsella consultation today. We are

proud to help the people in Charleston, South Carolina, and surrounding areas overcome incontinence once and for all.

H2: Emsella FAQs

H3: Who is a good candidate for Emsella treatment in Charleston, South Carolina?

Emsella treatments at Body Rejuvenation Institute in Charleston, SC, are an excellent option for anyone experiencing urinary incontinence. Whether due to aging, childbirth, or other factors, weakened pelvic floor muscles can cause urinary incontinence. Emsella treatment is safe and effective for all ages, making it an ideal treatment option for anyone seeking relief from urinary incontinence.

H3: How many Emsella treatment sessions do I need?

The number of Emsella treatment sessions you need will depend on your individual needs and the severity of your urinary incontinence. Typically, patients require four to six sessions, each lasting 30 minutes. However, the treatment is spaced out over several weeks to ensure the patient experiences the best results.

H3: How quickly will I see results from the Emsella chair?

Most patients experience improved bladder control and a reduction in symptoms of urinary incontinence within the first few sessions. The full results can be seen about three months after the treatment. However, the exact results may vary between individuals.

H3: Are there any side effects of using the Kegel Throne?

The Kegel Throne, or Emsella, provides safe treatments with minimal side effects. However, some patients may experience mild soreness or tenderness in the treated area after the treatment. Still, it typically eases off within a few days. Additionally, the treatment is non-invasive, so there is no downtime required.

H3: Does insurance cover Emsella?

Insurance coverage for Emsella treatment varies by provider and policy. Some insurance companies cover the cost of Emsella treatment. However, others may require a copay or out-of-pocket expense. Contact your insurance provider to see if they cover the Emsella treatment under your plan.
