FEEDBACK ON ZINC.CASH

Kudos to the team! The overall experience has been smooth so far. However, I noticed something I'd like to clarify.

Whenever I open Zinc Cash in a regular browser like Chrome or Brave and try to connect my wallet, it redirects me to my wallet but doesn't prompt the connection even after somewhile. The connection only works when I access Zinc Cash through the wallet's built-in browser.

Is this expected behavior, or is it something specific to my device or setup?

Proof:
