

*\*\* This is the way I would solve the puzzle. Some members can be solved in multiple ways :)*

## ***NCT 2020 Logic Puzzle Walkthrough***

We can determine from the first clues provided that the member in *B5* was born in 1999 is not a member of WayV. From our four options (Lucas, Mark, Xiaojun and Hendery), *Mark* is the only member that fits this criteria.

*Jaehyun* is in *C3*.

Mark and Jaehyun's clues reveal that the member in *D2* is a member of both NCT 127 and NCT Dream. Since Mark is already eliminated as an option, this only leaves *Haechan*.

*Ten* is in *C4* and *Taeyong*, the leader of NCT 127, is in *B1*.

Xiaojun, Lucas and Hendery are in Row 5, in some order (NCT 2020's clue). Ten reveals he is not adjacent to anyone who debuted in 2018. Since *Lucas* debuted in 2018, he cannot be in *B5* or *C5*, leaving only *A5*.

Since visuals are not adjacent to each other (Jaehyun's 2nd clue), *Xiaojun* has to be in *B5*, and *Hendery* has to be in *C5*.

Despite Taeyong's clue, Jisung is not in Column E. Because of Xiaojun's clue, Renjun and Chenle cannot be in *B2*. Jaemin and Jeno cannot be in *B2* either as they would be adjacent to Taeyong, who is a visual. This leaves *Jisung* in *B2*.

*Taeil* is in *D2*.

Two members of NCT are adjacent to Taeil, Haechan being one of them. The other member has to be in *E2*, as only Jeno and Jaemin, who were both born in 2000, can be in that box. That means that *C1*, *C2* and *E1* *CANNOT* be members who were born in 2000. This eliminates the possibility that *Renjun* is in *C2*, meaning he is in *A2*, so *Chenle* is in *C2*.

Winwin and Yangyang have to be in *A3* and *A4* in some order (Xiaojun's clue). They cannot be in *C1*, as Winwin would be adjacent to Taeyong (Jaehyun's clue) and Yangyang would be adjacent to Taeil. Winwin is not in *D3* or *D4* despite being a member of NCT 127, as he would be adjacent to Jaehyun. As Lucas is in *A5*, *Winwin* has to be in *A3*, and Yangyang in *A4*.

It is only possible for *Kun* to be in *C1*.

The only way possible for Yuta not to be adjacent to Jaemin is if *Yuta* was in *D4* and *Jaemin* was in *E2*. This means that Jungwoo is in *E1*.

Shotaro is in the same row as Yuta (Yangyang's clue), so Shotaro is in *B4*.

*Jeno* cannot be adjacent to Jaemin (Jaehyun's clue), so he is in *E4*.

*Johnny* is the only member left that begins with J, so he must be in *E3*.

Since only members of NCT 127 can be in Column D, *Doyoung* is in *D3*, so Sungchan must be in *B3*.
