twig daddy, plant consultations and spring plant sales

Dear Friends,

What holds most people back from growing abundant, long-living food plants?

The most common answer I hear: **fear of not knowing enough**. And that makes total sense.

The average American can recognize over 1,000 corporate logos but fewer than 10 native plants from their own region. And it's not our fault! I blame our schools; I blame centuries of colonization; and I blame the homogenization of our food system... but **I don't blame you!**

That's why **Twig Daddy is all about making transformation, abundance, and resiliency EASY**. You don't need a degree in horticulture or landscape architecture to create your dreamy food-scape (I certainly didn't have one!). ...But a little guidance can certainly help. 😊

[Book a Free 15-Minute Twig Daddy Consultation!](#)

No strings attached. No sales pressure. Just a friendly chat to answer your questions, learn more about plants, and figure out what might work best for your space.

🌱 **Schedule your [free consultation](#) today!**

And if you haven't already, check out our [Growing Guide](#) on the website—it's a great starting point.

Longing for Spring,
David @ Twig Daddy
