

An Age of Revolutions

For this project, you will be required to research and report on a topic dealing with the many “revolutions” of the time period. The following are some of the possible topics for the project.

American Revolution
Mexican War for Independence
Industrial Revolution
Second (British) Agricultural Revolution
Napoleonic Wars

French Revolution
Revolution in Latin America
Haitian Revolution
Glorious Revolution
Irish Rebellion of 1798

The Project – For the project, you will have to research your topic and then use your research to create a poster that showcases the main ideas of your assigned revolution. You must make sure to explain what the revolution was and why it happened. Think of the following... Who were the key players? What were the main events? What were the end results? A complete list of requirements can be found on the “Age of Revolutions” project rubric.

Work time – I will be giving some time in class to research and work on the project, but to do a good job (and receive a good grade) you will need to do work outside of class.
