

Schoology Parent Account Help Guide

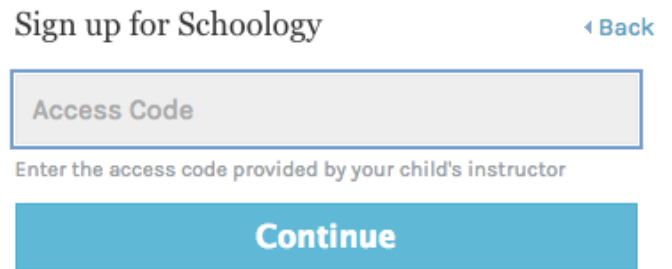

Schoology is a **digital learning environment** where learning can take place. Called a learning management platform, we use Schoology to test a student's knowledge, to provide directions for class, to post homework assignments, and even organize school clubs and activities. Your child will access Schoology in grades 3-12 using their Google account. This can be found as an **Application on your mobile devices** or through the website www.schoology.com as well.

We encourage all parents to sign up for a free Schoology account using an email address to stay abreast of what's happening in your child's academic world! Parents will need a special code for each child called a parent access code which teachers or the school office can provide. You can always **add additional children after you first set up your account.**

1. Go to www.schoology.com or use the **Schoology App**. Choose **Sign Up** and select **Parent**.

2. Type in the **Access Code** for your child.

3. Create an **Account** using *your* name, *your* email address, and a password. Approve the Terms of Use and click **Register**.
