Summary

A sharp, shiny, smooth, metallic structure.
I hear metal against stone/rock - AOL sword

Asthetic impact: Feels like being on a
mountain top, huge, barren, black, icy, cold
and the only way down is to ski on the
black ice - sheer drop, shiny, steep, angled.
Anxiety!

Thank you

Target Reveal

<https://www.random.org/>

Target reveal

- Former Changi Hospital (located in Sg)
- Postal code = 506997 (target ID).
- It is a now-defunct and abandoned hospital in Singapore (the actual compound is off limits to the public)
- Built by the British government in 1935
- served as a British military hospital during World War 2.
- Occupied by Japanese forces during the war
- Abandoned in 1947 (not demolished) ?

Paranormal activities - Famous haunted place in Sg

- Reports of ghostly apparitions, especially children and Japanese soldiers.
- many believe the hospital's dark history and tragic events have led to its paranormal activities.

- Guided tours available from various operators.

videos.
- Google for more info~ regarding this hospital. j

target H201024: viewer will describe the first minute and twenty five seconds of the first movement from Beethoven's Fifth Symphony as in the recording

<https://www.youtube.com/watch?v=7eOaliHB58U>

“

wow, you drew the notes sheets. You wrote futuristic because it was futuristic when it was performed. Also in films it's associated with that. You even wrote four "flip" like the main motif... I think the keywords 'rotate' 'diagonal shapes' relate to the mathematical aspect of music, since it's all well tempered. Tehnological relates to the instruments. "Fact off" is also a great characteristic of the tune since it's very confrontational, as all of old B's music. "One dominating the other" - "on backing down" could mean the conductor conducting the players... lol "On+off", "digital" - that's almost all music. I'm impressed, Nina! "Fake" - art isn't real, so there you have it... Ideogram is similar to presidential elections: That was the face off

”
