

WHO ARE WE?

We are a company that creates large-scale Industrial Automation Systems, especially for Oil & Gas companies. Yes, we are the creator of the system, not merely a distributor as most of companies in Indonesia. Our systems are all large-scale, nation-wide and mission-critical nation-wide to serve the people of republic Indonesia for 24 hours for years. To say as an example, in Pertamina and its subsidiaries, our system has been running for 12 years supporting the fuel distribution of fuel to SPBU via Truck in all cities in Indonesia. Recently, Pertamina expands our scope to provide Terminal Automation System in both LPG and BBM, and also to provide automation systems in all Pertamina ports in Indonesia as well. Thousands of servers and devices has been put across Indonesia to support our systems.

WE NEED CANDIDATES THAT HAVE:

- Passions in programming or creating software and devices to solve our client's problem.
- At least Bachelor Degree (S1 or D4), preferably in Informatics Engineering/Computer Science from a reputable university.
- Able to **PASS** our Programming Test
- Willing to work overtime or on holidays. You will get bonus for this.
- Willing to travel and to client's sites when required. You will get financial support for this.
- Willing to be under contract for at least 2 years for the experienced.

WHAT WILL YOU GET?

- **Negotiable salary** depending on your test result and qualification/experience.
- **Other benefits** include: Overtime, transport allowance, whole family health insurance, outpatient, bonuses, etc.
- **Housing** : We strive to enable our staffs to stay near office to avoid tiring traffic jam in Jakarta. As such, we provide lodging in office for singles for free. To enable those with families to have a decent house, we also build two of our offices in Cileungsi, 1 hour from Jakarta. Here, most of our married staffs can buy a healthy house near office at the price of house rent in Jakarta.
- Good Experience as we are among the very few companies in Indonesia that are certified to create a large scale automation systems in a hazardous area of an oil and gas companies. Our systems are generally more complex than most IT systems in Indonesia.

OUR WORKING ENVIRONMENT

We want a stress free environment in our office, because most of our work involves creative thinking. Hence, we employ similar free environment strategy as those implemented in multi national companies like: informal attire, no shoes, flexible working hours, working on floor.

OUR OFFICE LOCATIONS

DKI Jakarta & Cileungsi (Bogor).

HOW TO APPLY
