***Did the work receive funding?** If so, please provide the information below:

Funding Institution	Example: The research reported in this manuscript was funded by the first author's master's/doctoral fellowship (FAPERJ, Process No. XXXX) and by the third author's research productivity fellowship (CNPq, Process No. XXXXX).
---------------------	--

Declaration of conflicts of interest

() The authors declare that there are no conflicts of interest.

Information suppressed to ensure anonymity

In the manuscript text, the following information has been suppressed to ensure author anonymity. This information should be reinstated during the layout stage:

1. [Ethics Committee of University XXX, CAAE No. 00000001.0.0000.0000]
2. Authorship information omitted to ensure blind review (if applicable).
Example: "Author, 2025" should be replaced with "Silva, 2025".
Reference: Silva, A. (2025). Title of the work. São Paulo, SP: Publisher.

AUTHOR INFORMATION

ATTENTION: Completion of full data for all authors is mandatory. This information, except for phone number, will be published if the manuscript is accepted. Please complete according to authorship order.	
AUTHOR 1	
Full Name	XXXX
Institutional Affiliation	INSTITUTION NAME, CITY, STATE AND COUNTRY. Example: State University of Rio de Janeiro, Rio de Janeiro, RJ, Brazil
ORCID	http://orcid.org/0000-XXXX-YYYY-ZZZZ
Phone	(XX) XXXX-XXXX
Corresponding e-mail	XXX@gmail.com
AUTHOR 2	

Full Name	XXXX
Institutional Affiliation	INSTITUTION NAME, CITY, STATE AND COUNTRY. Example: State University of Rio de Janeiro, Rio de Janeiro, RJ, Brazil
ORCID	http://orcid.org/0000-XXXX-YYYY-ZZZZ
Phone	(XX) XXXX-XXXX
Corresponding e-mail	XXX@gmail.com

AUTHOR 3	
Full Name	XXXX
Institutional Affiliation	INSTITUTION NAME, CITY, STATE AND COUNTRY. Example: State University of Rio de Janeiro, Rio de Janeiro, RJ, Brazil
ORCID	http://orcid.org/0000-XXXX-YYYY-ZZZZ
Phone	(XX) XXXX-XXXX
Corresponding e-mail	XXX@gmail.com

AUTHOR 4	
Full Name	XXXX
Institutional Affiliation	INSTITUTION NAME, CITY, STATE AND COUNTRY. Example: State University of Rio de Janeiro, Rio de Janeiro, RJ, Brazil
ORCID	http://orcid.org/0000-XXXX-YYYY-ZZZZ
Phone	(XX) XXXX-XXXX
Corresponding e-mail	XXX@gmail.com

- **Does any author or co-author currently have a manuscript under review or awaiting publication in the journal Estudos e Pesquisas em Psicologia?** (Note: The journal publishes only one manuscript per year per author or co-author, counted from the publication date of the last accepted manuscript.)

Yes

No

DATA AVAILABILITY

Regarding the availability of research data, the author(s) of the manuscript titled _____ state that:

Data available in a publicly accessible repository: *The research data are openly available in the repository [INSERT NAME], at: [INSERT URL/DOI].*

Data available upon request due to restrictions (e.g., privacy or ethics): *The research data are available upon request from the corresponding author.*

Data available within the manuscript: *The research data are available within the manuscript.*

Data sharing not applicable: *No new data were created or analyzed in this study.*

Notes:

- Only one option must be selected.
- Even when there are no data to share, or when data cannot be made publicly available, this statement must still be provided.
- This statement will be published together with the manuscript.

DECLARAÇÃO DE CONTRIBUIÇÕES DOS AUTORES (CREDIT)

CRedit (Contributor Roles Taxonomy) is a high-level taxonomy comprising 14 roles that can be used to represent the contributions typically made by authors in scholarly and scientific work. These roles describe the specific and individual contributions of each author to the research.

The taxonomy provides a standardized way to represent information about individual author contributions. Its purpose is to ensure transparency regarding contributions to scientific work, thereby improving attribution, credit, and accountability. It is important to note that more than one role may be assigned to a single contributor.

1. **Conceptualization** – Ideas; formulation or development of research goals and objectives.

2. **Data Curation** – Management activities to annotate (produce metadata), clean, and maintain research data (including software code, when necessary for data interpretation) for initial use and later reuse.
3. **Formal Analysis** – Application of statistical, mathematical, computational, or other formal techniques to analyze or synthesize study data.
4. **Funding Acquisition** – Acquisition of financial support for the project leading to this publication.
5. **Investigation** – Conducting the research process, specifically performing experiments or data/evidence collection.
6. **Methodology** – Development or design of methodology; creation of models.
7. **Project Administration** – Management and coordination of the planning and execution of the research activity.
8. **Resources** – Provision of study materials, reagents, participants, laboratory samples, animals, instrumentation, computing resources, or other analysis tools.
9. **Software** – Programming, software development; design of computer programs; implementation of code and supporting algorithms; testing of existing code components.
10. **Supervision** – Oversight and leadership responsibility for the planning and execution of the research activity, including mentorship beyond the core team.
11. **Validation** – Verification of the overall replication/reproducibility of results/experiments and other research outputs, whether as part of the activity or separately.
12. **Visualization** – Preparation, creation, and/or presentation of the published work, specifically data visualization.
13. **Writing – Original Draft** – Preparation and writing of the initial draft of the manuscript (including substantive translation).
14. **Writing – Review & Editing** – Critical review, commentary, or revision of the manuscript by the research group, including pre- and post-publication stages.
Curadoria de dados – Atividades de gerenciamento para comentar dados (produzir metadados), limpar dados e manter dados de pesquisa (incluindo código de software, onde for necessário, para interpretar os dados propriamente ditos) para uso inicial e posterior reutilização.

Author credit must be based on substantial contributions. For this work, the following contribution roles have been assigned in accordance with the CRediT taxonomy:

Manuscript title: (Insert the full title of the manuscript)		
Authors	Roles	Signature
Example: John Doe Smith	Conceptualization; Formal Analysis; Methodology; Writing – Review & Editing	Insert each author's signature (electronic signature is accepted)
Author Name 1		
Author Name 2		
Author Name 3		
Author Name 4		

Acknowledgment note	(If applicable; see notes below)
----------------------------	---

Notes

- It is common for a single researcher to have performed multiple roles during a project. Therefore, multiple roles may be assigned to the same individual when appropriate.
- The same role may be assigned to more than one contributor, particularly when different researchers have contributed similarly to a given stage of the project.
- • Not all CRediT roles apply to all projects. Roles that are not relevant to the study do not need to be included.
- •Author signatures may be provided digitally via the gov.br platform, which offers a secure system for authentication and validation.
- •All individuals who contributed to this study but do not meet authorship criteria must be acknowledged appropriately. All persons named in the acknowledgment note must have provided written consent.

Statement on the Use of Artificial Intelligence in Research

This statement is intended to inform the journal about the use of Artificial Intelligence (AI) tools in the research process. The authors must indicate: (a) whether AI tools were used during the production of the manuscript (e.g., data collection, analysis, writing,

translation, image or graph generation); (b) the type of AI tool used (e.g., generative, review, or translation); (c) the specific tool used, including a brief description and access link; and (d) that the use of AI complies with the journal's guidelines and does not compromise the scientific integrity of the work.

Use of AI

At which stage of the research was the AI tool used? What justified its use?

Type of AI Used

What type of AI tool was used (e.g., generative, review, grammar correction, or translation)?

Research Procedures Supported by AI

For which procedures was AI used (e.g., data collection, analysis, writing, translation, image or graph generation)?

General Information about the AI Tool

Tool used:

Access link:

Brief description of the tool and its functions:

If AI was used for quantitative or qualitative data analysis:

Describe the automated analytical procedures performed by the tool and the decisions made by the researcher.

It is hereby declared that the use of artificial intelligence in the preparation of this manuscript complies with the guidelines of the journal *Estudos e Pesquisas em Psicologia* and the *Committee on Publication Ethics (COPE)*. Human authorship bears full responsibility for the submitted manuscript.
