2.0. INTRODUCTION:..... 2

3.0. INCIDENCES ADDRESSED:..... 2

EMERGENCY TELEPHONE CONTACT NUMBERS..... 5

1.0. OBJECTIVE:

The objective of this procedure is to provide directives and assistance so that crisis situations can be dealt with effectively, by ensuring prompt mobilization, control of facilities and people and also keep personnel prepared for such occurrences to protect lives and minimize damage to assets.

2.0. INTRODUCTION:

In case of emergency, as defined in these procedures, the Contractor's HSE Manager becomes the person in charge (PIC) of the response and of the application of the emergency response plan. He remains in charge unless relieved by the Site Project manager.

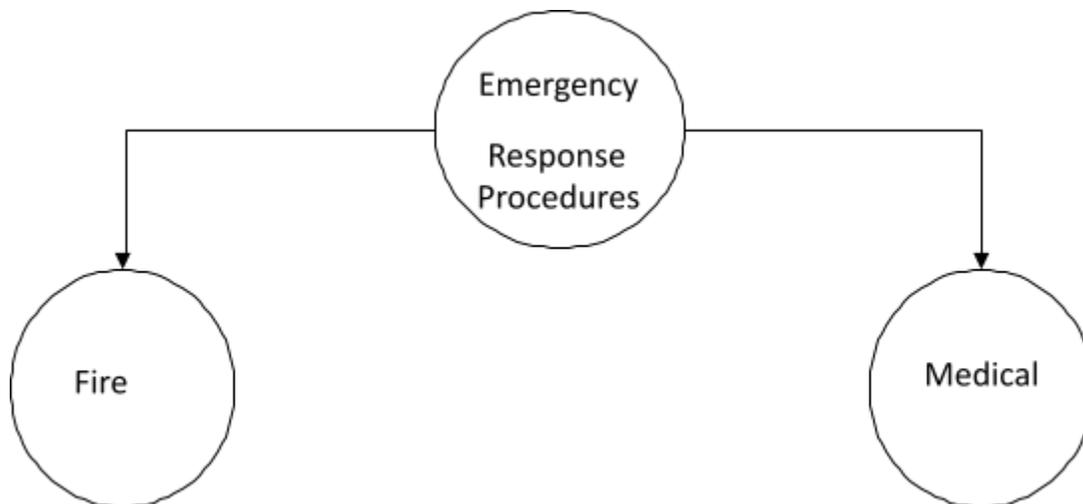

The Site HSE manager has been designated as the person in charge of activating the emergency plan because this is part of his responsibility at site.

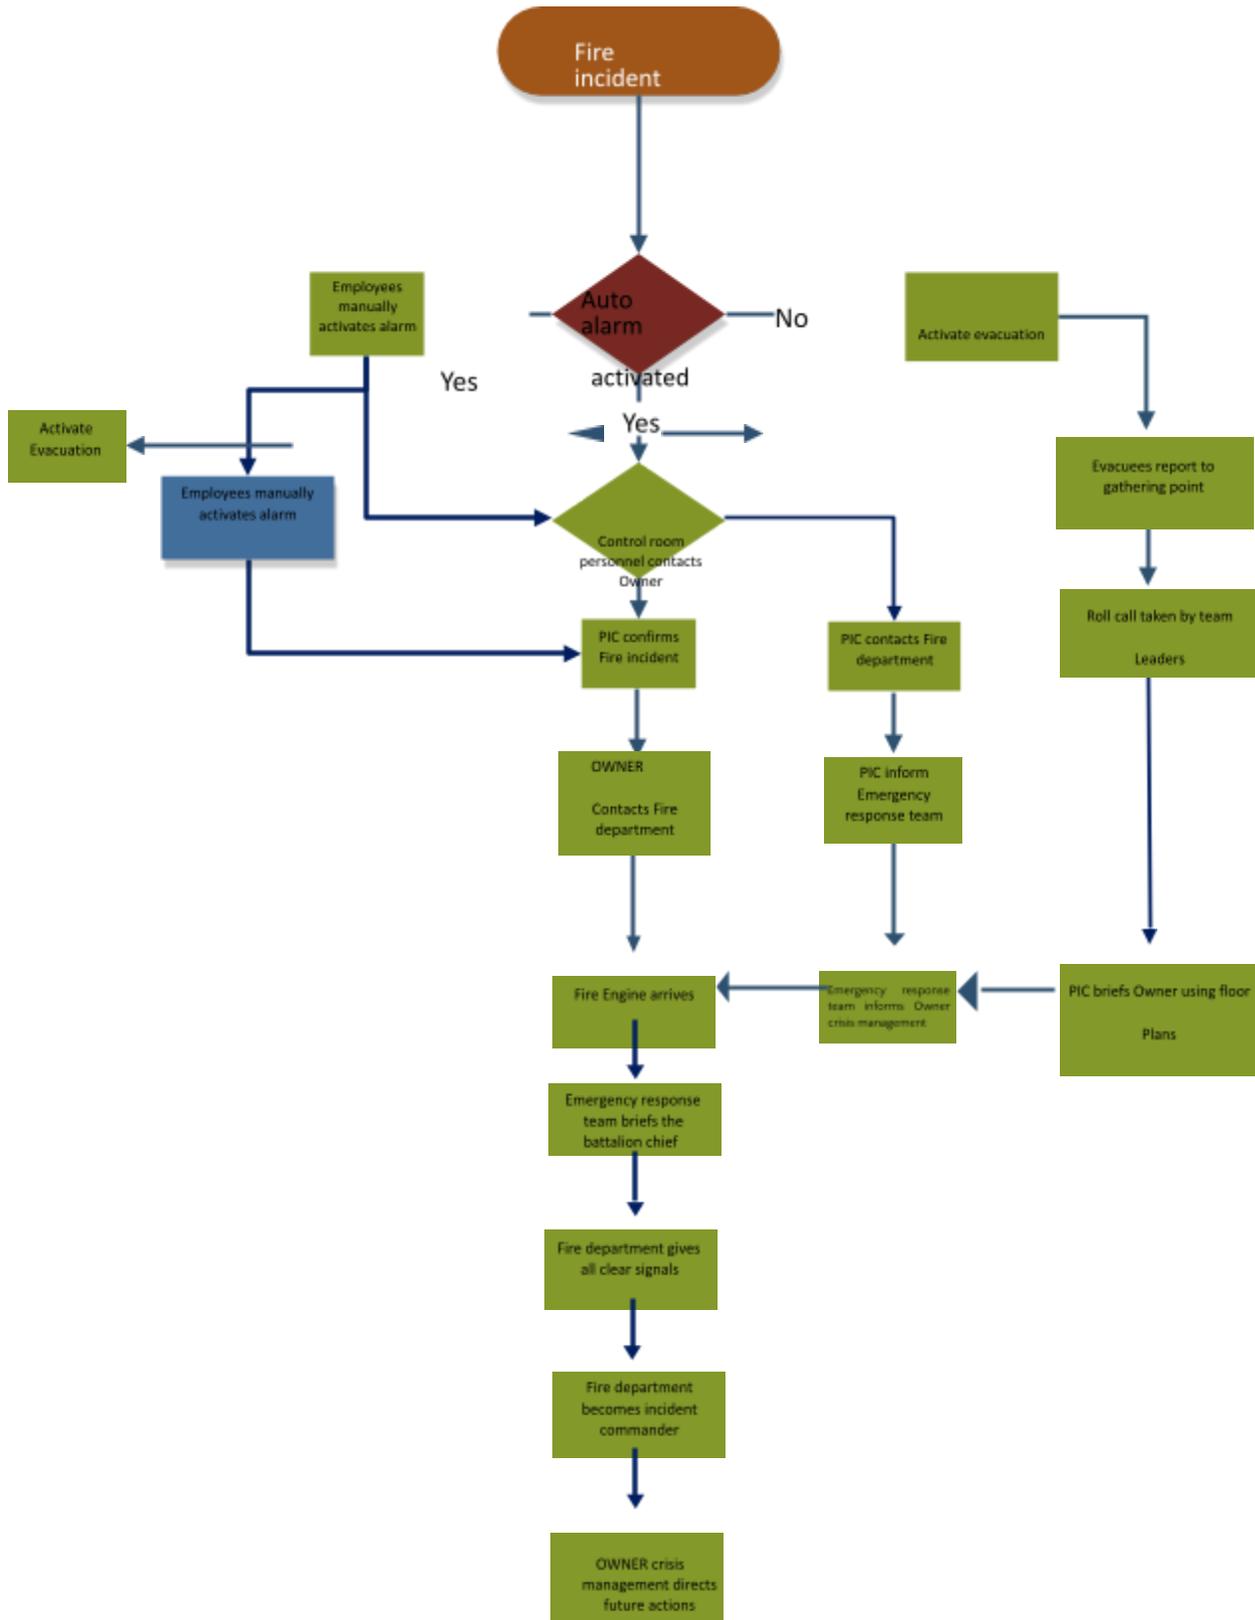

Depending on the type of emergency and as the plan is activated this responsibility may be passed on to other individuals, but it is essential that one person is responsible for the activation of the plan.

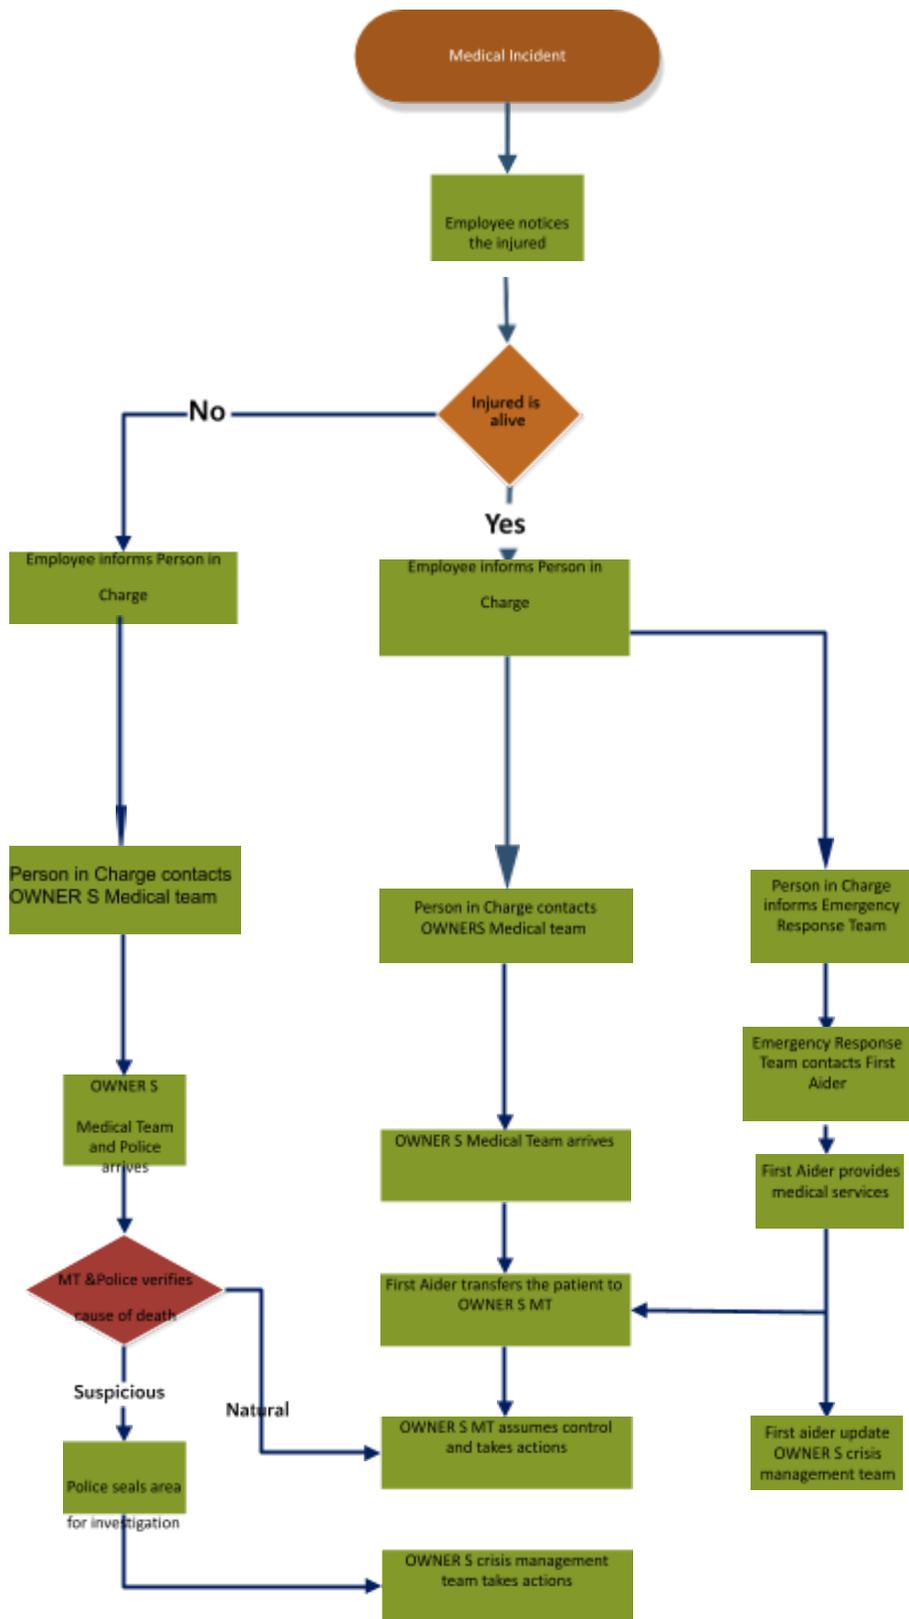

If the Site HSE manager is unable to respond to the emergency due to injury or other circumstances, the Project manager takes charge of the response until relieved by a Responsible person.

3.0. INCIDENTS ADDRESSED:

This emergency response plan will be used to address incidents that may occur during Commissioning. Below is a list of some of the incidents that would trigger the initiation of emergency response
