

What is painful about your personal Current State?

I think that the most painful and scary thing about my personal current state is that im not in bad conditions at all. Im in a normal and medium class with good commodities, enough to make a man stay in his place and not progress ever. That is what im trying to escape.

What is desirable about your personal Dream State?

As everyone, all im searching about is freedom and to make it past the 9-5 bucle.
