Abstract: The abstract should be a single, self-contained paragraph of no more than 200-250 words. It must offer a clear and concise overview of the paper's content, including: (1) Background: briefly introduce the broader context and the specific research question; (2) Purpose/Aim: state the main objective of the study; (3) Methods: summarize the principal methodology or analytical approach; (4) Results: highlight the most significant findings; and (5) Conclusions: present the primary conclusion and its contribution to the field. The abstract should avoid references or citations and refrain from using uncommon abbreviations; if such abbreviations are essential, define them upon first mention. Ensure that the abstract objectively reflects content presented and substantiated in the main text.

Book Antiqua 9pt Bold, Space 1, Justify

Keywords: Immediately after the abstract, provide a maximum of five keywords, avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Introduction

Book Antiqua 11pt Bold, Space 1, Justify

The introduction serves to outline the overall structure of the manuscript and ensure that it aligns with the journal's author guidelines. Submitted papers must comply with the prescribed standards, including a similarity check using tools such as Turnitin or iThenticate, with a maximum allowance of 30%. Adhering to these requirements helps to maintain the quality of the manuscript and safeguard the credibility of the journal's publication process.

This section should begin by presenting the broader research context and situating the problem within relevant literature. When citing multiple references, they should be listed in chronological order, for example: (Djalante, et al., 2011; Kamara, et al., 2018; Rani, et al., 2020; Hidajat, et al., 2021; Khan, et al., 2023; Wen, et al., 2023; Dwirahmadi, et al., 2023; Aeni, et al., 2024; Prayoga, et al., 2024; Ramadhan & Taqiyuddin, 2024).

Authors are encouraged to highlight key debates, gaps in knowledge, or unresolved issues in the field, and emphasize why these aspects strengthen the importance of the study being conducted. The objectives of the research must be clearly stated, along with its significance, while underlining the originality and contribution to current scientific advancements. Authors may also describe how the study addresses existing gaps, revisits established assumptions, or introduces innovative methodological approaches. The introduction should remain clear and accessible to readers from related, though not necessarily identical, disciplines. Conclude this section by summarizing the main objectives and briefly noting the expected findings or conclusions to be presented.

Book Antiqua 10pt Regular, Space 1, Justify

Method

Book Antiqua 11pt Bold, Space 1, Justify

The Methods section should provide sufficient detail to enable other researchers to replicate the study. If the research employs established procedures described in previous sources, those works should be cited. The description should emphasize any modifications, adaptations, or specific applications made within the scope of this study.

1. Example Subsection

Book Antiqua 10pt Bold, Space 1, Justify

Formula should be mentioned in text, centred and numbered consecutively throughout the manuscript as Equation 1, Equation 2, and so forth.

$$x = f(x, u) \quad (1)$$

Tables should consist of original and editable text (not embedded as a figure), without vertical borders

(only horizontal borders and bold formatting). Use single line spacing, font size 10, as exemplified in **Table 1**. Ensure that tables are centered and appropriately numbered.

Book Antiqua 10pt, Space 1, Justify

Table 1 Place each table positioned close to the point where it is first mentioned.

No.	Title 1	Title 2
1	Entry 1	Data 1
2	Entry 2	Data 2
3	Entry 3	Data 3

Palatino 9pt, Space 1, Justify

2. Example Subsection

Book Antiqua 10pt Bold, Space 1, Justify

Provide a concise explanation highlighting the table's purpose and relevance. All figures and tables should be referenced in the main text, using standardized labels (e.g., **Figure 1**, **Table 1**). Experimental methods can be supported by a diagram that clearly illustrates the process and is accompanied by a legend.

Figure 1 This is a figure

Please submit your figures both embedded in your Word file and in their original format (not embedded, as a supporting file during online submission). For printing purposes, a vector format is preferred. In the case of photos, etc., a resolution of 300 dpi should be provided. Ensure that all text in the figures is readable with a font size of ≥ 8 pt. Figures and captions should be numbered and centered. Place your figures in the beginning or end of pages.

Result and Discussion

Book Antiqua 11pt Bold, Space 1, Justify

Field surveys and in-depth interviews revealed three key findings regarding community resilience in Dasan Geria Village after the 2018 Lombok earthquake:

- Strength of Social Networks** – Residents relied heavily on kinship ties and neighborhood groups to share resources, arrange temporary shelters, and channel assistance.

2. **Role of Social Norms** – Local customary rules (*awig-awig*) encouraged collective action in rebuilding damaged houses and sustaining *gotong royong* during the recovery phase.
3. **Trust in Institutions** – Higher levels of trust were placed in local leaders and religious figures compared to external organizations, influencing the speed and effectiveness of aid distribution.

Quantitative survey results (N = 120 households) indicated that 72% of households received initial support from neighbors or relatives, while only 28% obtained assistance from formal institutions during the first two weeks following the disaster.

These findings highlight the central role of social capital in disaster response and recovery. Consistent with Putnam's (2000) theory, *bonding social capital* (close community and family ties) played a vital role in meeting immediate needs, while *bridging social capital* (connections with external organizations) became more significant during the later recovery stages.

Conclusion

Book Antiqua 11pt Bold, Space 1, Justify

Reliance on traditional norms demonstrates that disaster mitigation strategies must be culturally sensitive. Programs that integrate local wisdom (*awig-awig*) are more likely to gain acceptance and sustainability within communities (Adger, 2003). This study contributes to the disaster mitigation literature by showing that **trust, norms, and networks are not only survival mechanisms but also long-term strategies for resilience building**.

Book Antiqua 10 pt, Space 1, Justify

Acknowledgments

Book Antiqua 9pt Bold, Space 1, Justify

Express gratitude to individuals or institutions that contributed to the research process. This may include funding agencies, laboratories that provided facilities, or colleagues who assisted in writing, reviewing, or editing the manuscript.

Book Antiqua 9pt, Space 1, Justify

Author Contributions

Book Antiqua 9pt, Space 1, Justify

Clearly state the role of each author in the study, covering aspects such as conceptualization, methodology, data collection, analysis, and manuscript preparation.

Book Antiqua 9pt, Space 1, Justify

Conflicts of Interest

Book Antiqua 9pt, Space 1, Justify

Authors must declare any potential conflicts of interest. If none exist, include the statement: "The authors declare no conflict of interest." This ensures transparency and safeguards the integrity of the research.

Guideline for bibliography in JDMR is as follows:

1. Ensure that every reference mentioned in the text appears in the reference list.

2. Double-check that author names, publication years, and other citation details are consistent between the text and the reference list.
3. Minimum 10 references for research article and 50 references for Literature Review, 80% of them are primary references such as journal articles, conference proceedings, and thesis/dissertation.
4. The references applies APA 7th Edition (*American Psychological Association*). Further read about APA is available here <https://apastyle.apa.org/>
5. Ensure that all cited sources are readily accessible and linked through DOI.
