

Hello LQPV Families!

MCA testing season is upon us. Our district's third and fourth grade students at both A-M and MMN elementary schools will begin testing in the area of Reading the week of April 8th. These same students will be testing in the area of Math during the week of April 29th. Please remember that attendance at school during these testing weeks is extremely important. Make sure your student is well-rested and has a healthy breakfast either at home or at school.

An additional reminder is that cell phones and wearable technology are not allowed in the testing spaces. Students will be instructed to place their cell phones and wearable technology in their lockers during testing. If a student is discovered using a prohibited device at any time during testing, the device will be confiscated and given to the building leader. Additional MCA testing information can be found on the district's website.

Our teachers and students have been working diligently to ensure everyone is prepared for MCA testing and your continued support at home is a key piece of student success.

Go Eagles!
