Classic mechanics and physics will be applied! Almost all extra bosses will not be affected and will adapt to this mode! However, some may lose their quirk (unique ability)!

#### EXTRA BOSSES DLC PASS 2 (Extra Bosses V3)

Dark Bowser: No Items + PSI Experience W/ Teammate Pseudo

Death: Worship (Oh no, I'm not fighting a pathetic mortal like you. You'll die when I touch you anyway. You take care of this, Life.)

Dragonlord: ... (His majesty sends out a royal guard W/ Critical Various and W/ Teammates kitty & metalhead)

Luffy: Elasticity + "Gentle" Giant

Chuck Norris: Reinforcements

Petey Piranha: Photosynthesis

Herobrine: Creative Mode (W/ CPU Teammates Zombie & Enderman)

metalhead (formerly hawk): Metalhead

ninten: PSI Experience

dino piranha: Photosynthesis

NEW SPIRIT CLASS: "MYTHIC" (\*\*\*\*\*)

BEYOND MORTAL LIMITS.

These are truly legendary spirits that have achieved epic status in the world of Super Smash Bros. Ultimate Deluxe. Their power surpasses that of even the most formidable opponents, and they are revered by all who have had the privilege of facing them in battle. These spirits make the league of Legends cower in fear! Only the bravest fighters can hope to stand against them and emerge victorious.

\*\*\*\*\* Giganova (Giga Bowser & Fury Bowser Only) - Unleashes a distracting supernova after being KO'd to throw off surviving players for the rest of the battle.

\*\*\*\*\* Ultimate Running Start (1 Slot) - Boosts all stats for the entirety of your first life.

\*\*\*\*\* Poison Mutation (2 Slots) - Being poisoned heals you AND greatly increases your power.

\*\*\*\*\* Double Trouble (0 Slots) - Start matches with a clone to assist you.

\*\*\*\*\* Invisibility (0 Slots) - You will occasionally become invisible.

\*\*\*\*\* Double Extra Life (0 Slots) - Gives you and your teammate extra lives.

\*\*\*\*\* Lightspeed Final Smash Meter (2 Slots) - Increases FS meter charging speed and decreases the opponent's FS meter charging speed.

\*\*\*\*\* Plasma (Giga & Fury Bowser Only) - Use your Final Smash and you will be covered in a plasma flash to throw off your opponent. You can use this to reverse being slowed by a Timer or other causes too! Even if you don't have a Final Smash, you can still press B to use it!

\*\*\*\*\* Big Bertha (0 Slots) - Gives you the most powerful weapon in the Super Smash Bros. omniverse at the cost of ALL of your defense.

\*\*\*\*\* Flight (0 Slots) - Gives you an unlimited recovery. If applied to a CPU or FP, it will give them the ability to use any recovery move as much as they need without limits.

\*\*\*\*\* Trickster Flight (Bowser's Only) - Similar to Flight, only you can trick your opponents into trying to finish you with a meteor smash and send them falling! However, this costs one stock.

\*\*\*\*\* Ultimate Final Smash (2 Slots) - Buffs your Final Smash to KO the opponent regardless of their percentage. If you use a Final Smash from the FS meter, it won't KO the opponent, which is why this ability grants you another Final Smash to use to finish your opponent. However, you can also take not one, but TWO stocks from them with this!

\*\*\*\*\* Immortality (3 Slots) - The most powerful spirit ability in the whole game. Makes you 99.99% immortal, meaning you cannot be KO'd by normal means.

\*\*\*\*\* Grappling Hook Arms (Marth Only) - Greatly increases grab radius.

\*\*\*\*\* Reinforcements (3 Slots) - The Government will send attack copters to aid you in battle.

\*\*\*\*\* Worship (3 Slots) - You will be equipped with an item you hold dear to you of your choice. The item will always come back to you like a boomerang, regardless of what happens in-battle.

\*\*\*\*\* "Gentle" Giant (3 Slots) - You become giant at the start of the battle & near the end of the battle.

\*\*\*\*\* Metalhead (3 Slots) - You become metal at the start of the battle & near the end of the battle.

\*\*\*\*\* Critical Various (3 Slots) - When at high damage, you are applied various effects, those being Giant, Metal & Healing.

\*\*\*\*\* PSI Experience (3 Slots) - Makes you extremely light and floaty, especially on your first stock, on top of granting you Instadrop via PSI magic.

\*\*\*\*\* Incognito Mode (0 Slots) - Hides your activity to throw off and confuse your opponent. Never let them know your next move!

\*\*\*\*\* Faker (0 Slots) - Morphs you to look like a character of your choice to throw them off without limitations, including skins! (pssst, try playing as a vanilla boss on the classic mode bonus stage)

\*\*\*\*\* Possession (0 Slots) - All classic/vanilla bosses have the ability to possess their opponents including assists & pokémon!

\*\*\*\*\* Bane (0 Slots) - Galeem & Dharkon can instakill you after you "KO" either of them in battle, meaning if you don't have a teammate to fight against one of them with, you lose the battle!

\*\*\*\*\* Sound Of Silence (0 Slots) - Plays a sound to distract and throw off opponents.

\*\*\*\*\* Subinvisibility (0 Slots) - Turns multiple attacks in the stage invisible.

\*\*\*\*\* Superintelligence (HUMAN PLAYERS ONLY, NOT A SUPER EASY MODE FEATURE AND IS ALLOWED NORMALLY) - Grants immunity to Possession. You can move freely without having to worry about becoming a puppet!

\*\*\*\*\* Falchion (Marth Only) - A huge sword that can slice opponents from far distances.

\*\*\*\*\* Slow Motion (Novice Hand Only) - Slows down the entire battle.

(\*\*\*\*\* , 0 Slots) Elasticity - Greatly increases the range of your attacks.
