

Install PIF using the Lightweight Installer

Developed by: megaman [Tech Manager for Pokemon Infinite Fusion]

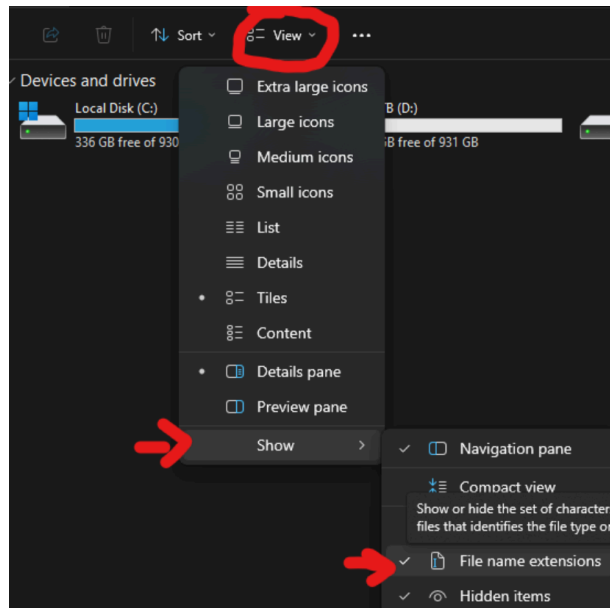

Updated Video Guide: [YouTube](#)

Steps:

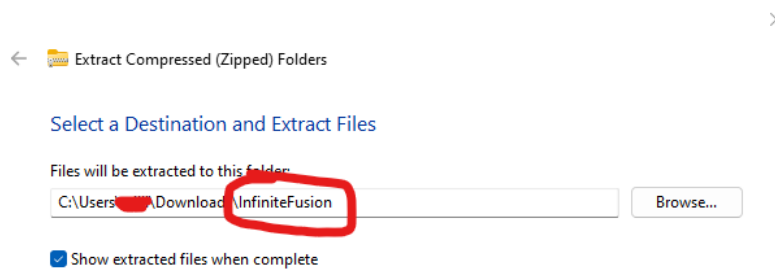

1. Download the Lightweight Installer: [LINK HERE](#)
 - a. **Make sure to leave this in your Downloads folder. Not desktop or documents cause Onedrive will break it**
 - b. Backup Google Drive Link: [Backup](#)
 - i. If the backup goes down, I can't do anything about it. Google is strict.
2. Right click InfiniteFusion.zip and click Extract All

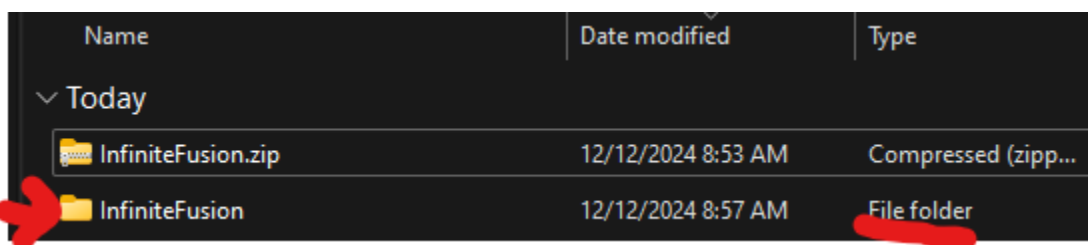

If you don't see **.zip**, that just means you have an option turned off on your computer. Use the screenshot below to enable it.

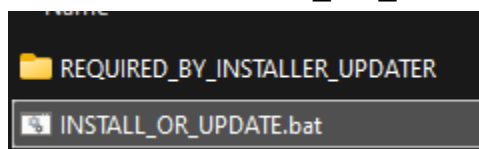

After you click Extract All, make sure it says **InfiniteFusion** at the end of it then click **Extract**.

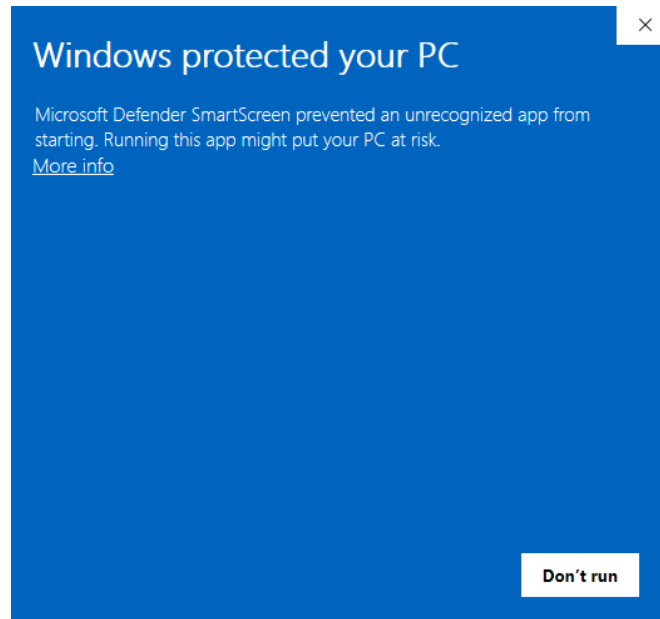

3. After extracting, open the FOLDER, not the zip, named InfiniteFusion
 - a. The folder **MUST BE** named InfiniteFusion for it to run.

4. You will see 2 files. Double click **INSTALL_OR_UPDATE.bat**.

If you get this Message below, click **More Info**. Then the button “Run Anyways”

5. Installation will open in a command prompt

```
hint:
hint: Names commonly chosen instead of 'master' are 'main', 'trunk' and
hint: 'development'. The just-created branch can be renamed via this co
hint:
hint: git branch -m <name>
Initialized empty Git repository in C:/Users/ /Downloads/pif/Infini
remote: Enumerating objects: 39669, done.
Receiving objects: 30% (11901/39669), 74.77 MiB | 37.33 MiB/s
```

The 30% above you see is the % completed. Wait for this to finish.

6. Once it finishes, you will see the following below:

- a. **Red Line:** This means it worked
- b. **Blue Line:** The text underlined in blue will not match the screenshot, but as long as you see the red lined text you are good.
- c. If you don't get the red line, send a screenshot to #tech-support of the window or read the section below of a common error.

```

- The above means YOUR connection to the game server was disconnected.
- Only thing you can do is try again, reset your modem, or use our new Launcher. It comes with the Full Game and All Sprites in the zip: [Launcher Guide](#)

7. You can close this and go back to your folder. All the files will be in the folder. Open Game.exe to play the game.

How to Update the Game

Double click INSTALL_OR_UPDATE to update the game
