Housekeeping

- ★ Convener and notes: Martina S.
- ★ **Next meeting**: Friday, Feb 19th

Agenda items

1. Productivity Statistics (Laura)
    - Draft vision/proposal
2. Audit trail (Björn, all)

Minutes

- ★

Chat

Von Travis, Brooks L an alle: 05:35 PM
I'll have to leave the call at 5 minutes 'til. Just wanted to let you know.
I just scheduled a meeting with a developer for midnight my time.
It's better for me than 5 or 6am my time.
Von Travis, Brooks L an alle: 05:50 PM
Is this something that would make sense to just record as a queryable attribute in an audit log? Where these (possibly optional) fields in the records were used to populate the audit log record?
I just question the statistical/reporting utility of free-form text.
Von Owen Stephens an alle: 05:51 PM
I'd understood Laura to say that something recorded automatically by the system would not be sufficient
Von Travis, Brooks L an alle: 05:56 PM
I would say that any implementation of this should be as an external data model to the instance, holding, or item records.
That just points to them by Id
I have to run. Apologies.
Von Owen Stephens an alle: 06:01 PM
I think a question in my mind is whether this is a pattern (as Laura suggests) that can be adopted by different modules as necessary, or if it is a single implementation that integrates across Folio modules
The "Metadata" elements we currently have are pattern based - each module is responsible for implementing this individually
Von Laura Daniels (she|her) an alle: 06:01 PM
Owen, are you thinking of something like a productivity stats helper app?
Von Owen Stephens an alle: 06:02 PM
I think I prefer the idea of a pattern to be honest, but I think this question needs asking
sorry - answering
Von Dennis Bridges an alle: 06:02 PM
It also does seem like two distinct features to me. Tracking changes and then tracking the tracking of changes.
Von Owen Stephens an alle: 06:19 PM
That's going to be a huge amount of data :)

But potentially you could record changes - it’s still going to be a body of data, but not close to storing a full copy everytime
Von Ann-Marie Breaux an alle: 06:22 PM
And here's the change tracker Epic in Jira: https://issues.folio.org/browse/UXPROD-782
Von Owen Stephens an alle: 06:23 PM
That post says it’s an “app” - I’m not convinced that’s a good idea
Von Owen Stephens an alle: 06:23 PM
That post says it’s an “app” - I’m not convinced that’s a good idea
I think it needs some technical analysis
Von Khalilah Gambrell an alle: 06:25 PM
Not all apps have that.... for example eholdings app does not have it and it would be difficult
Von Ian Ibbotson an alle: 06:29 PM
I imagine agreements and licenses would want this
Von Susan Martin an alle: 06:29 PM
I've got to go to another meeting. Great discussion.
Von Ian Ibbotson an alle: 06:30 PM
Apps like KB+ do this
Von Owen Stephens an alle: 06:31 PM
I could imagine an ERM team wanting to track work in a more detailed way - but we’ve not had the discussion in the subgroup and no-one has ever come to me with it as a priority
We can certainly talk about this at a ERM subgroup
The other thing that comes out of this topic is the “macro” concept Laura mentioned. This seems like something that will be of interest across Folio

Attendees list

Present	Name	Home Organization
X	Ann-Marie Breaux	EBSCO
X	Brooks Travis	Missouri State University
	Craig McNally	EBSCO
	Charlotte Whitt	Index Data
X	Dennis Bridges	EBSCO
	Gill Osguthorpe	UX/UI Designer - K-Int
	Heather McMillan Thoele	TAMU
	Ian Ibbotson	Developer Lead - K-Int
X	Ingolf Kuss	hbz
X	Jana Freytag	VZG, Göttingen
	Khalilah Gambrell	EBSCO
X	Kirstin Kemner-Heek	VZG, Göttingen
X	Kristin Martin	Chicago
X	Laura Daniels	Cornell
	Lloyd Chittenden	Marmot Library Network

	Mark Deutsch	Duke
X	Martina Schildt	VZG, Göttingen
X	Martina Tumulla	hbz, Cologne
	Mike Gorrell	Index Data
X	Owen Stephens	Product Owner - Owen Stephens Consulting
X	Susan Martin	MTSU
