Animal Presentation Requirements

- Name of animal
- Habitat- Climate conditions, plants, bodies of water, terrain, etc
- Its predators and its prey- What does it eat, and what eats your animal?
- Where in the world they can be found
- Appearance- size, colors, features,
- Adaptation- special features that help it survive (for example- fur color that blends in with its environment, sharp claws to hunt, thick fur to stay warm)
- What things can we personally do to help keep this animal safe and healthy? For example, If your presentation is on tigers in the rainforest, you could suggest that we use less palm oil, because harvesting palm oil is destroying their environment.
