

SILVER MINER — PRIVACY POLICY

Privacy Contact: silverminersupport@gmail.com

1. About This Policy

This Privacy Policy explains how Silver Miner collects, uses, stores and shares information when you use its account, mining simulation, rewards, VIP plans, referral, wallet and withdrawal features.

Silver Miner uses centralized infrastructure for account management, reward calculations, payment verification and withdrawal administration. Certain wallet transactions take place on public blockchain networks. The application as a whole is not fully decentralized.

This Policy describes our data practices. It does not replace any separate disclosure or consent required by applicable law.

2. Information We Process

Account and Profile Information

When you register or sign in, we process information provided by you or your authentication provider, which may include:

- Name and profile image.
- Email address.
- Account identifier and authentication-related information.
- Account creation date, status and preferences.

Mining, Rewards and Referral Information

We process mining-session records, mining power, reward balances, bonus claims, advertisement reward confirmations, VIP-plan information and referral activity.

Referral records may include a referred user's display name, profile image, joining date and reward information. Limited referral information may be visible to the referring user through the referral network screen.

Wallet, Purchase and Withdrawal Information

We process wallet addresses, wallet labels, supported-token balances, transaction hashes, payment amounts, order identifiers, network information, withdrawal requests and transaction statuses.

These records may be linked to your Silver Miner account to verify payments, activate plans, administer withdrawals and prevent transaction reuse.

Device, Security and Technical Information

We and our service providers may process:

- Device or installation identifiers.
- Operating-system and application information.
- Device-integrity signals, such as emulator or rooted-device detection.
- IP addresses, connection information and technical logs.
- Application usage and advertisement-interaction information.
- Notification delivery tokens.

Support Information

If you contact support, we process your email address, message content, attachments and relevant account or transaction details.

Do not send sensitive wallet access information through support messages.

3. How We Use Information

We use information to:

- Create accounts and authenticate users.
- Provide mining sessions, rewards, bonuses and referral features.
- Display wallet information and facilitate supported transactions.
- Verify payments and activate VIP plans.
- Record and review withdrawal requests.
- Deliver notifications and service updates.
- Detect duplicate transactions, account abuse and fraudulent activity.
- Diagnose errors and understand service usage.
- Provide customer support.
- Meet applicable legal obligations and resolve disputes.

Wallet synchronization additionally creates account-linked wallet records and mining snapshots as described above.

We do not use this Policy as permission for undisclosed or unrelated processing.

4. Advertising and Analytics

The App integrates Google advertising services and Firebase Analytics.

Advertising providers may process device identifiers, IP addresses, approximate location inferred from an IP address, ad interactions and diagnostic information. Processing depends on the provider, device settings, consent choices and the advertising configuration.

Rewarded-ad completion information is used to determine eligibility for the corresponding in-app benefit.

Where required, advertising consent is requested through an available consent interface. Device settings may also provide advertising controls. Contact us if you need assistance with a privacy choice.

Information about Google's practices is available at:

<https://policies.google.com/privacy>

5. Who May Receive Information

Information may be processed by:

- **Google and Firebase:** for authentication, hosting, database services, notifications, analytics, security and advertising.
- **Advertising and mediation providers:** to deliver and measure advertisements and validate rewarded-ad activity.
- **Blockchain infrastructure providers:** to query balances, broadcast transactions and verify payments.
- **Authorized service personnel:** to provide support, administer the service and investigate requests, subject to applicable access controls.
- **Other users:** only where a feature displays limited information, such as referral-network records.
- **Authorities or professional advisers:** where disclosure is legally required or reasonably necessary to address legal claims, security incidents or fraud.

If ownership of the service changes, relevant information may transfer subject to applicable law, appropriate protections and any required notice.

Advertising-related processing may qualify as “sharing” or similar regulated activity in some jurisdictions. Applicable rights depend on your location and the processing involved.

6. Public Blockchain Information

Blockchain transactions may publicly disclose wallet addresses, transaction amounts, token information, timestamps and transaction hashes.

Public blockchain information may be accessible to independent third parties and may remain available indefinitely. We cannot erase records from a public blockchain.

An address is not necessarily anonymous, particularly when it can be associated with an account or other information.

7. Legal Grounds for Processing

Where applicable law requires a legal basis, we rely on the appropriate basis for the particular activity, which may include:

- Providing the service or fulfilling a purchase agreement.
- Complying with legal obligations.
- Legitimate interests, such as security and fraud prevention, where those interests do not override your rights.
- Consent, where required.

Not every data practice is necessary to provide every feature. Optional or unexpected processing requires separate handling where applicable law requires it.

Where processing relies on consent, you may withdraw it without affecting the lawfulness of processing that occurred before withdrawal.

8. Storage and International Processing

Information may be stored or processed in countries other than your country of residence because we use international service providers.

Where legally required, appropriate transfer safeguards must apply. You may contact us for information about the locations and safeguards relevant to your data.

Our use of international infrastructure does not remove applicable privacy obligations.

9. Data Retention

Information is retained according to its purpose, account status, security needs and applicable legal requirements.

Operator retention schedule — complete before publication:

- Account and profile records

- Mining, rewards and referral records
- Payment and withdrawal records
- Support correspondence
- Security and analytics records
- Server-side sensitive wallet information and mining snapshots
- Backup copies

Information subject to a valid legal hold may be retained longer. Public blockchain records are outside our deletion control.

10. Security

The App uses authentication, device secure-storage facilities and backend security mechanisms to help protect information.

These measures reduce risk but do not guarantee that information cannot be accessed, disclosed, altered or lost. We do not claim that the App or wallet features are completely secure.

Protect your device and account, and contact support promptly if you suspect unauthorized access.

11. Your Rights and Choices

Depending on your location, you may have rights to:

- Request access to your personal information.
- Correct inaccurate information.
- Request deletion.
- Restrict or object to certain processing.
- Obtain a portable copy of eligible information.
- Withdraw consent.
- Exercise applicable advertising-related opt-out rights.
- Complain to the relevant privacy regulator.

Send requests to **silverminersupport@gmail.com**. We may request proportionate information to verify your identity, but you should not provide wallet recovery information for this purpose.

Requests will be handled within applicable legal time limits. Some requests may be subject to lawful exceptions, which we will explain where required.

12. Account and Data Deletion

To request account deletion, email **silverminersupport@gmail.com** with the subject “**Account Deletion Request**”, preferably from the email associated with your account.

Identify the account you want deleted. You may also request deletion of associated server-side wallet records and mining snapshots.

Some information may need to be retained for legal, fraud-prevention or dispute-resolution purposes. Any applicable exception will be explained.

Uninstalling the App does not automatically delete server-side records. Account deletion does not erase public blockchain transactions or transfer assets held in a wallet.

13. Children

Silver Miner is intended for adults aged 18 and above.

If you believe a child has provided personal information, contact us so we can investigate and take appropriate action.

14. Third-Party Links

The App may link to external documents, websites, exchanges or blockchain explorers. Those services have their own privacy practices.

This Policy applies to Silver Miner’s processing and does not replace a third party’s privacy policy.

15. Changes to This Policy

We may update this Policy when our practices, features or legal requirements change.

Updates will show a revised “Last Updated” date. Material changes will be communicated where required, and additional consent will be obtained where applicable.
