## **Setting Level and Destination**

Before your students can start studying, you'll need to establish **Settings**. To access all settings, click on the wheel icon on your classroom card.

Note: A student's <u>Level</u> is where they currently are in their understanding of the content. <u>Destination</u> indicates the highest level of material a student will have access to. We recommend that you:

- Set Level slightly <u>lower</u> than where you think the student is in their understanding.
- Set Destination a few grades ahead of your students so they have access to more challenging material as well.

On the Student Settings card, select the desired **Level** and/or **Destination** for your student from the drop-down menus. Then, click "Apply Settings" (see image below).
