

Wristband Collection

In order to access the events during the AI Summit, you will need a wristband. [Buying a ticket](#) allocates you one wristband which can be collected during our CodeNight in FAB2.43 7-9pm on the 15th or anytime from 9am on the 17th and 18th in OC0.01 or in front of OC0.03.

Please take care not to lose your wristband as you will not be able to access the events without it!

Static Exhibition

During Saturday and Sunday, there will be a static exhibition showcasing the innovative projects and research that Warwick AI has undertaken in the past! During breaks between the main events, feel free to come here to explore, chat or simply get some coursework done.

Detailed Schedule

Saturday

Introduction from WAI Pres and VP

11am OC0.03

The beginning of the AI Summit! Hear from our President and Vice President about the various activities going on over the weekend, ways you can get involved and find out what the AI Summit is all about.

Competition Announcements

11:30am OC0.03

Starting this weekend, Warwick AI will be running some competitions. These are a great opportunity to get involved and test your AI skills!

Seeing the Unseen: Using CNNs for Image Steganalysis

12pm OC0.03

Steganography is the art of hiding data in plain sight, used to exfiltrate data from unsuspecting organisations. This event explores the challenges of performing image

steganalysis and shows how Convolutional Neural Networks can be applied to detect hidden data in images.

AI Safety Panel Discussion with Google Deepmind, Conjecture, Oxford University and Arcadia Impact

1pm OC0.03

As the prevalence of AI continues to grow rapidly, it is becoming increasingly important to ensure that it is deployed in ways that empower rather than undermine humanity. In this panel, professionals from Google Deepmind, Conjecture, Oxford University and Arcadia Impact will discuss their experience in the newly established field of AI safety, various avenues for aligning AI with human interests and the future of AI.

Creating an AI Startup by [TRUSS](#)

2pm OC0.03

AI and Startups aren't topics typically found at the forefront of your educational syllabus, yet they are essential ingredients for some of today's greatest scientific triumphs, wealthiest individuals, and prosperous economies. In this talk, Connor will speak about his journey from discovering computer science as a fresher at Warwick, to co-founding TRUSS, a successful fashion data startup providing services to some of the biggest names in the industry. All 4 co-founders will be present to answer questions at the end, they will also be looking to recruit flexible hours data scientists and data scrapers, so stick around if these roles interest you.

The AI Revolution: Ethics, Technology and Society by [IATL](#)

4pm OC0.03

In recent years, AI has gone from a niche research field to a catalyst of massive technological advances. This event will explore the effects that this industrial change has on our ethical values, the technology we use and our society as a whole. This second half of this event will give insight into a module running next year by the Institute of Advanced Teaching and Learning and allow students to answer questions to help develop and create the module.

Summit CodeNight Social

6pm OC0.02

To round off the first day of events we have our CodeNight social! We will have food, music and some interesting AI based challenges to try to solve! This will be a chill event so feel free to bring any coursework or just come along to chat and talk about AI, we will also have some board games available to play!

Sunday

AI and Blockchain Workshop by [Encode Club](#)

11am OC0.03

AI and blockchain technologies are two major advances in recent years. In this session, Encode Club will introduce these technologies, demonstrate how they work together and give you the tools to explore them yourself! This event is beginner friendly and no prior experience is required, Encode will also be advertising their upcoming graduate opportunities!

AI Speed Friending

12pm OC0.02

Your network is your net worth! This event gives you the opportunity to meet like-minded AI enthusiasts and make connections. There will be various tables with different discussion topics and questions to get the conversation flowing. Come along and meet your future friends, colleagues, and even business partners!

WAI Project Presentations

2pm OC0.03

Over the years, members of Warwick AI have taken on a variety of projects covering a broad spectrum of applications. Come to hear what your fellow students have achieved and get inspiration for your own projects!

AI, Politics and Disinformation

3pm OC0.03

With the rise of generative AI, the prevalence of generated fake media such as DeepFakes has increased. With the Internet's communication capabilities, combined with the influence of social media, targeted fake media or disinformation campaigns are starting to emerge. In this session, we will uncover case studies where AI technology has been used to undermine democracy and cause waves in the political landscape, and we will explore how governments can protect against this new threat.

Closing Remarks from WAI Pres

4pm OC0.03

The AI Summit may be finishing, but Warwick AI isn't! Hear from our President about how you can continue to be involved and uncover your future with AI, and find out about our exciting upcoming opportunities!

Stay in Touch
