Working with us will provide you with exciting career opportunities in a diverse environment and the chance to develop further professionally as well as personally.

What you'd get to do:

As a mobile/web software engineer, you will work as part of a team in a distributed agile environment. The ideal candidate for this role will have experience and passion for building beautiful, touch-enabled, functional, and responsive user interfaces and visualizations using the latest mobile and browser technologies.

Key responsibilities:

- Create beautiful and dynamic mobile user interfaces and visualizations
- Ensure unit tests are well written to provide maximum code coverage
- Perform peer code review and suggest code quality improvement techniques
- Assist with performance tuning

What we care about:

- Self-motivation, humility, and pride in workmanship
- Bachelor's degree in Computer Science, Engineering, or related discipline, or equivalent experience
- Software development experience in a team environment using distributed source control, continuous integration, and code quality analysis tools
- Object-oriented and functional programming experience
- Core web development expertise in JavaScript, HTML5 & CSS3
- Mobile development with hybrid frameworks preferred (Ionic, Cordova, Xamarin or equivalent)
- Experience with Javascript frameworks (Angular, React, Ember, Bootstrap, or equivalent)
- Experience consuming ReSTful APIs required; experience developing ReSTful APIs a plus
- Experience writing automated unit tests, using Jasmine, PhantomJS, Protractor
- 3+ years' experience as a Web or Mobile Developer or directly relevant position
- Experience with common patterns, frameworks and tools - like node, flux, mobx, git, npm, grunt, gulp, gradle - and anything else you think is the latest and greatest
- Strong written and verbal communication skills

If you are interested, please send your CV to jobs@aktiun.com. We are looking forward to hearing from you.
