PROJECTS

Christmas Wish List

<https://github.com/keenwilson/ChristmasList> | <https://tbl-christmas-wishlist.herokuapp.com/>

Role in project: Express server and back end API

Our app was designed to help people find items for christmas or other holidays. Users can create a wish list of items. API, NODE, EXPRESS, BOOTSTRAP, VUE.JS, JAVASCRIPT, HTML, CSS, MYSQL

What's For Dinner

<https://github.com/keenwilson/group5-studio-meal-plan> | <https://keenwilson.com/group5-studio-meal-plan/>

Role in project: API functionality, most of the JavaScript functionality

Our app was designed to help people plan their week's dinner, or find a restaurant if they don't have time to cook. API, AJAX, BULMA CSS, JQUERY, JAVASCRIPT, HTML, CSS

DBZ Fighter Game

<https://github.com/tblukens/unit-4-game> | <https://timlukens.com/unit-4-game>

Fun fighting game where you choose a DBZ fighter and then you select another to fight against. Choose wisely. Displays strength with front end design.

EXPERIENCE

Full Stack Teaching Assistant - University of Kansas / Trilogy Education - Part Time

2019 - Current

Teach students in an intensive full stack flex coding environment. Students will learn multiple skills to prepare them for all challenges and aspects of software development. Very rewarding and challenging job that enables me to help others learn coding as well as continue my ongoing, always learning coding career.

- Stay before and after class to help struggling students one on one.
- Q&A sessions before class to help students catch up.

Shop Metal Worker – Mike Bryant Heating & Cooling – Overland Park, KS

2017 - 2019

Fast-paced team environment. Displayed strong adaptability and rose quickly from insulation worker to complex ductwork builder.

- Trained multiple people that have since taken those skills and moved up in the company.
- Aided in reorganization to streamline job pulls for increased productivity
