O.2. Faculty and staff have better presentations and up-to-date reports

With the availability of ICT resources, digital tools, and training, faculty and staff at Partido State University are able to deliver more professional presentations and generate timely, data-driven reports. The use of applications such as MS Office Suite, Google Workspace, and other tools enables the preparation of well-structured reports, accurate financial and academic records, and visually enhanced presentations. Access to institutional portals and real-time data from systems such as SIAS further ensures that the information presented is updated and reliable. As a result, management decision-making, classroom instruction, and external reporting have significantly improved in quality and timeliness.
