HOW TO PERSONALIZED SWIPE

>>> Here is a prompt to use with ChatGPT to modify <<<

Act as a copywriter specializing in affiliate marketing. I am providing you with an email swipe and would like you to modify it slightly to make it unique while maintaining its essence. Please make improvements that increase the click-through rate on the call-to-action, but keep the changes minimal. Here is the email content for you to modify:

[PASTE the email content here]

Tips

1. YOUR AFFILIATE LINK CAN BE FOUND AT <http://scale.gg/jv>
2. You can log in to check your stats or get your affiliate link at the link above.
3. Link your affiliate link to all blue links and images.
4. Always use the affiliate link you get from the widget; do **NOT** use the one that redirects to. **Never** **get your affiliate link for the final URL in the address bar.**
5. Copy and Paste this text into a Google Doc where you can edit it. Make sure to keep only some of the text selected when done. This **annoys and confuses** other affiliates.
6. Edit the {first_name} tag to match your CRM and your salutation.
7. You may need to reformat this after you paste it into your email-sending service.
8. Do not post direct affiliate links in your email. Always link to words or calls to action to avoid being blocked by Gmail.
9. Do NOT use MASKED domains that do not redirect. They will get clicks, **but it WON'T drop your cookie.**

These are guideline swipes. It is best to change 20% of this email and use your own words and personality for better results. If you just copy/paste this email, you may see lower deliverability rates due to other affiliates sending the same email.

Use ChatGPT to modify emails slightly. See Below. Consider using a “slightly” different subject line to stand out from other affiliates.

Why This Matters (Especially Right Now)

Most business owners are:

- Paying for 10–33 different tools...
- Fighting with integrations that break weekly...
- Watching subscription creep eat away profit...
- Juggling logins, APIs, and duct-tape setups...

ScalePlus eliminates *all* of that by giving you one full ecosystem—built from the ground up to work together.

You cancel dozens of subscriptions... and replace them with one ridiculously affordable plan.

And during this sale, people are locking in a price that **nearly doubles after the deadline.**

The Apps Alone Make This Worth It

Every major category you can think of is included...

Digital Marketing Suite

Funnels, pages, email, memberships, webinars, eCommerce.

Client Services Suite

Lead finder, CRM, calendar, invoicer, doc signer, project management.

AI Growth Suite

AI campaigns, chatbots, brand engine, image generator, GPT tools, high-ticket scripts, and more.

If you wanted to assemble all these separately, it would easily cost over \$3,000–\$5,000 per year.

Most SaaS founders would *never* discount something like this.

But ScalePlus is doing it—for a short Black Friday window.

Preview: The biggest all-in-one business upgrade of the year is officially open.

Hey {first_name},

I rarely say this... but *this is the upgrade I've been waiting for too.*

A huge announcement just dropped — and it affects every online business owner who uses funnels, pages, email, coaching, consulting, courses, or client work.

A major all-in-one platform just opened its doors for Black November — giving everyday business owners access to **32 powerful apps inside one unified system.**

Funnels, CRM, email, scheduling, invoicing, AI content, design tools, client workflows... everything you normally pay for separately is now bundled under one roof.

And during this Black November window, the pricing is so low it feels like a mistake — but it's live right now and flying under the radar.**.

The Big News

Groove alone already handled funnels, email, courses, memberships, video hosting, webinars, and e-commerce.

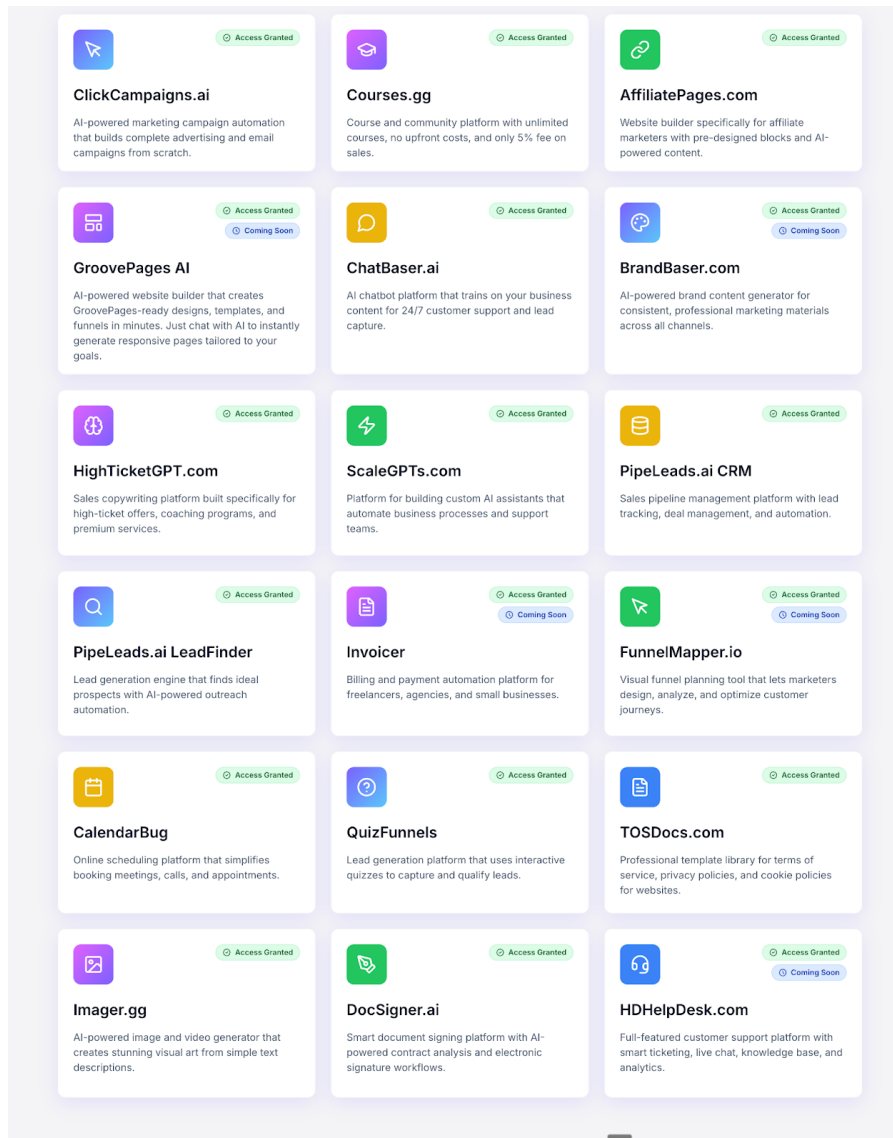

ScalePlus takes all of that and adds:

- Client-services workflow suite
- CRM + Lead Finder
- Calendar booking
- Invoicing
- Doc signing

- Project management
- Quiz funnels
- Funnel simulation

Preview: The biggest all-in-one business upgrade of the year is officially open.

Hey {first_name},

Let me cut straight to it...

Something big just went live — quietly — and if you run any kind of online business, this is the kind of upgrade you don't wait around for.

A major all-in-one platform just opened an **early Black November window**, and instead of the usual “here's one new feature” announcement...

They dropped **32 fully integrated business apps** under one roof.

Funnels. CRM. Email. Scheduling. Invoicing. AI content. Design tools. Courses. Client workflows.

All the stuff people normally duct-tape together with 10–33 different subscriptions... now streamlined into a single ecosystem that actually works.

And the pricing for this early window? Let's just say it looks like somebody missed a zero — but it's real, and it's live right now.

The Big News

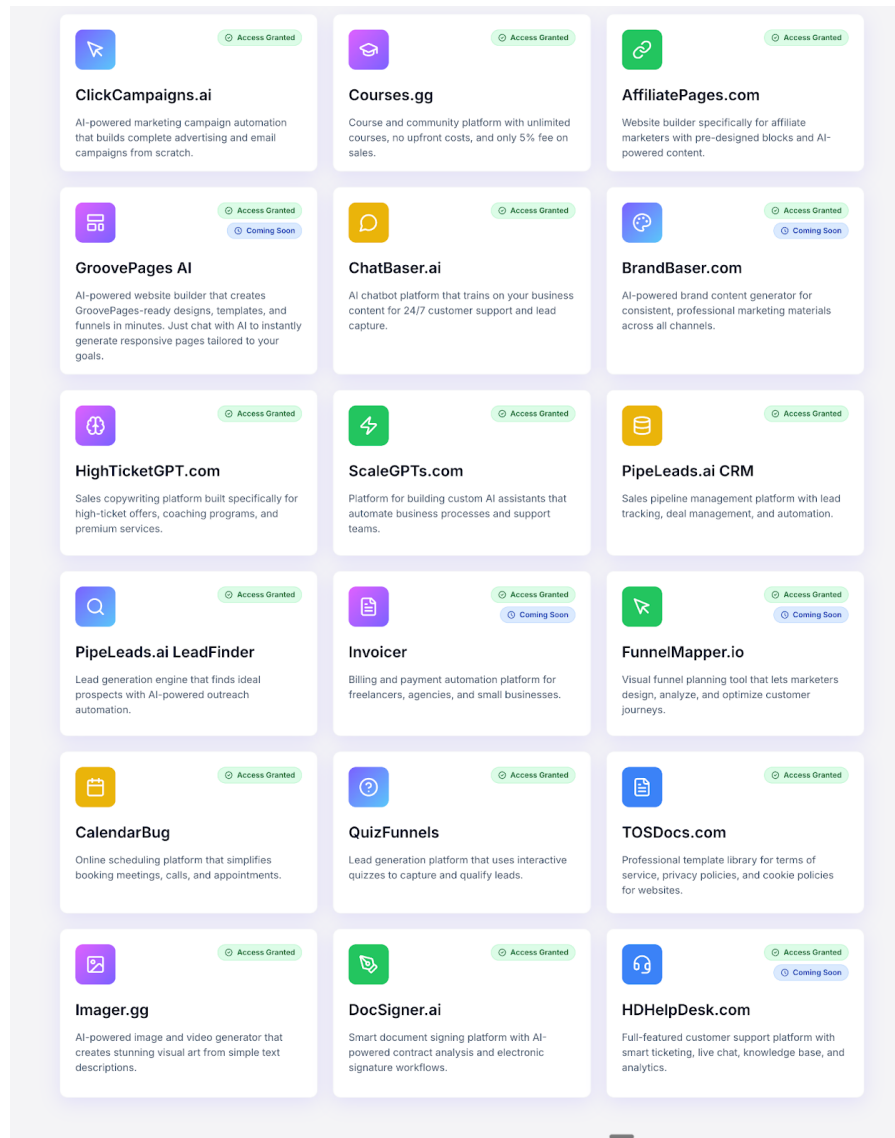

Groove gave you funnels, pages, email, courses, memberships, webinars, video hosting, and e-commerce.

ScalePlus takes ALL of that... and stacks **18 new fully built apps** on top:

- AI marketing & content tools
- CRM + Lead Finder
- Client-services workflow suite
- Project management
- Calendar booking

- Invoicing
- Doc signing
- Quiz funnels
- Funnel simulation
- Image generation
- Affiliate review site builder
- And more...

32 total apps. One login. One ecosystem. Zero duct-tape.
