PERSON WITH POSITIVE THINKING:

Even though he has been through many survival programs, Bobby has never thought of surpassing anyone. "I think of it in another way, I think that people will not surpass me after I've tried hard."

Although he's 20 years old, both from what he said above and other interviews, it's obvious that Bobby has a mature mind compared to most people at his age, beside that he's always having a positive mind. "The positive attitude must have been inherited from my parents. For me, my parents are teachers who I'm most afraid of, but also comedians who are the funniest, because I was affected by the positive attitude of my parents since young, so that maybe the reason my body brings that kind of elements (positive attitude)!"

However, when was asked what his biggest worry was right now, Bobby's answer is - Christmas.

"Because there isn't a girl whom I can prepare a special event for, so I'm worried. I want to have an interesting Christmas this year. Christmas last year was boring."
