SUBJECT: NY Times and EMF Conspiracies

SUBJECT: How to turn EMF toxicity OFF (in your body)

SUBJECT: 24/7 EMF solution also lowers stress

SUBJECT: The Plague of 5G (and how to survive it)

There's no denying that EMF (electromagnetic frequencies) are TOXIC.

In fact, over 240 scientists and doctors from 41 nations who have published research told the United Nations we need URGENT ACTION and reduced exposure.

And they wrote the FCC for a moratorium on the roll-out of 5G—citing the serious risks to human health and the environment.

Did anything happen? HECK NO—because 5G is poised to become a TRILLION DOLLAR INDUSTRY.

That's why you're "on your own" when it comes to EMF protection:

==> [Go here to discover a 24/7 EMF solution that metered testing shows REDUCES exposure and also boosts HRV \(which means lower stress\)](#)

There are so many problems with elevated EMF exposure, it's hard to know where to start...

For instance, EMFs have a dramatic effect on your body's parasites, along with candida and mold.

In fact, Dr. Dietrich Klinghardt, a world authority on EMFs and toxicity—has stated that EMFs increase excretions from candida, parasites, and mold by FIVE TIMES.

He explains that EMFs irritate them, stimulating them to overproduce toxic excretions and mycotoxins.

EMFs make those sensitive to parasite excretions and mold mycotoxins even sicker.

EMF exposure symptoms can also manifest as:

- Depression
- Anxiety

- Difficulty Sleeping
- Chronic Fatigue
- Headaches and Pain
- Brain fog, Poor Memory, Focus and Concentration
- Weight Gain/Slow Metabolism

==> [Plus, as you'll discover on this page EMFs disrupt your calcium channels, which has a toxic effect on your cells \(including mitochondria\) and your entire body.](#)

Now, you've probably seen different ways to mitigate EMFs by attaching something to your phone, or router in your home.

But sadly, your device or router or computer only represent a TINY FRACTION of the EMF you're exposed to on a daily basis.

The truth is, we're bathing in EMF around the clock:

- **Your neighbor's WiFi** (just click the WiFi icon on your computer... and depending on where you live, you'll probably see 5... 10... even 15+ WiFi routers in range)
- **Cell phone towers that reach into your home and everywhere in your city** (including new 5G towers and "range extenders" that are being added aggressively now)
- **"Smart meters" that measure your electricity usage emit massive amounts of EMF** into your home (even if you don't have one, your neighbor's smart meters are wifrying you!)
- **The "dirty electricity" in most walls** (the electricity in most homes and apartments was NOT designed with health in mind, and those wires emit toxic dirty electricity that can make you sick.)
- **Connected devices that send EMF via Bluetooth and WiFi** (billions are being created annually; even if you don't use connected devices, those around you do!)

The list is literally ENDLESS.

And with the nightmare of 5G (much stronger cell phone signals) rolling out right around the corner... you can't afford to ignore the EMF problem any longer.

==> [Go here to learn about my colleague's 24/7 EMF solution that metering tests and HRV experimental pilot group have shown positively changes your response to EMF.](#)

Here's the thing I love about this solution:

- You DON'T have to give up your cell phone or WiFi...
- You DON'T have to wear tinfoil hats or live in the woods...
- You DON'T even have to wear special headphones...

It's been a lifesaver for me and anyone who's tried it.

With the nightmare of 5G right around the corner... you can't afford to ignore the EMF problem any longer.

[Try out this breakthrough solution here on this page.](#)

You'll be glad you did.

AFFILIATE NAME

P.S.—The New York Times and other leading media outlets LOVE to publish articles trying to *debunk* those who believe in “5G conspiracies”...

But what they fail to tell you is they make BIG advertising dollars from wireless and cellular companies, who stand to make a fortune from the rollout of 5G and people falsely believing it's “safe.”

Yet 5G is NOT 100% safe and it's up to YOU to protect yourself and loved ones from the coming biological disruption it will create (==> [the first step is here](#)).
