When will my competency be graded and returned?

I generally grade on Saturdays. When an assignment is due it will **usually** be graded and returned by the following Monday. Any resubmissions or retakes will be also be graded and returned by the Monday after resubmission/retake.

What do I need to do to make sure my resubmission is graded?

If you resubmit an assignment you **MUST** fill out the retake request form or I will not regrade it. You can find the form on the Retake Request page on the class blog or follow the link [here](#).

How are labs and projects graded?

Labs and projects are graded on a 4 point rubric. The rubrics have a list of criteria and you can receive a score of "Exceeds" (4), "Meets" (3), "Does Not Meet" (3), or "Incomplete" (1). You can view your rubric scores at the bottom of your Google Doc.

How are tests graded?

Each question is graded on a +/-/0 scale. Grades on a 1-4 scale are determined using [this rubric](#).

Key for grading marks:

| | | |
|---|--|---|
|  |  |  |
| The plus means that you fully “get it” for every part of the question. | The minus means that your answer shows that you “sort of get” all the concepts and/or skills from the question. | The zero means that you “do not get” all the concepts and/or skills from the question. |

How do I clear a NM?

In order to clear a NM you must complete 4 steps:

1. Complete test corrections.
2. Complete the retake packet if available. You can get this from me.
3. Study the Quizlet flashcards for the unit if available.
4. Get a 4 on the Haiku practice test.

Once you have completed these steps there will be a retake waiting for you in the testing center. The testing center is open Tuesday-Friday after school and is located in the Omni Room.

Writing and Projects

Use the rubric and comments I gave you to revise and resubmit your lab or project. See above (What do I need to do to make sure my resubmission is graded?) to make sure it gets regraded.

What about finals?

Finals will be multiple choice tests. All 10th grade finals are “Do No Harm,” meaning a NM on the final will not affect your grade. Finals do, however, have the ability to clear previous NMs. If you pass a section of the final associated with a previous competency, you will receive a 2.5 on that competency. Because of the nature of multiple choice tests, you may not receive more than a 2.5.
