

Joining Sessions with the UK SimLab

How to Join and Attend a Scheduled Session as a LEARNER

1. After scheduling a session, you will receive an email with the Sim Specialist's Zoom link to the session. You will also receive an email from Mursion with a Session Card that you can add to a calendar system linked to your email or leave in your inbox. When it is time to join the session, you will simply click the Zoom link or open the Mursion email and Click START SESSION. You can share that Zoom Link or the Session Link (from the Session Card) with any remote learners who will be accessing the session.

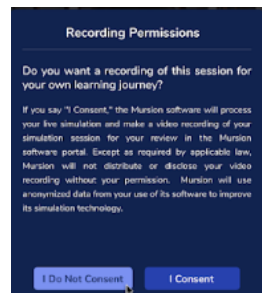

2. If you join via the Zoom link from your Simulation Specialist, jump to #4 below. If you join via the email from Mursion, you will log in with your User Name and Password.

3. A consent window will appear to ask for your consent to record. If you click I CONSENT, the recording will be made and uploaded to your portal. It will stay there for 365 days. If you click I DO NOT CONSENT your session will continue, but no recording will be made.

If your organization (e.g., professor) has requested the SimLab record the session for you or for their records, they will notify you. Your session will be recorded and the recording sent to your professor.

4. The next screen will let you know you are joining an external meeting. Click JOIN.

5. You will be placed into a Waiting Room briefly until the SimLab Zoom Room opens.

6. The session will start with a Mursion Host Avatar to welcome you and go over the format of the session. They will do a quick tech-check with you and then the Simulation will begin.
