I. Rules

I.1 General Rules

For the use of my codes, the following rules apply:

- Do not claim the code as your own work.
- Do not steal (parts of) the code.
- Do not use parts of my code with someone else's code.
- Do not redistribute the code to other websites.
- Do not use the code as a base code.
- Do not edit beyond recognition.
- Do not delete, alter, or move the credit.

You may share images of my themes and pages, which I have posted to tumblr, on other sites, if you credit me.

I.2 Extended Rules

For my premium codes, there are additional rules:

- Do not take the code from the preview blogs.
- Do not share the code with others.
- Do not sell the code to others.

I.3 Additional Note

All of my works are protected by a creative commons Attribution-NonCommercial-NoDerivatives 4.0 International (CC BY-NC-ND 4.0) license.

2. Features

2.1 Layout

- Responsive.
- Header + navbar.
- Pagination or infinite scroll.
- One, two, or three columns.

2.2 Posts

- Hide captions on the index (optional).
- Hide tags on in the index (optional).
- Like and reblog buttons on posts.
- All post types are supported.

2.3 Extras

- Custom audio styling.
- Custom lightbox.
- Custom links.
- Custom mobile toolbar.
- Custom scrollbar.
- Custom text selection.
- Custom tooltips.
- Search.

2.4 Accessibility

- Disable all fonts that are not sans-serif (optional).
- Disable tumblr's colored text (optional).
- Disable slanted / italicized text (optional).
- Tooltips on icon links.
- Aria-labels on text links.

3. Customization

3.1 General Information

If you run into any issues while trying to customize this theme, please take the time to read the information and help presented in this customization guide first. I will try to explain some basics here, so the customization process is easier for you.

Additionally, before you come to my inbox asking about something, try to do the following things first:

- Read this customization guide.
- Read through the FAQ. Maybe the question has been answered there.
- Read through the support or answered tag on my blog.
- Try to google the issue – w3schools, stackoverflow and others often have an answer.

If none of that helped you resolve the issue, send me a message via my inbox or the tumblr direct messenger.

Here is some basic etiquette because otherwise I either cannot or do not want to help you:

- Have patience – my life is busy and tumblr is not my job.
- Be nice – if you insult me, I will just block you.
- Come off anon if you send a question through the inbox.
- Please tell me what problem is occurring, where it is occurring, and ideally also which one of my codes you're using – the more information, the easier it is for me to help you, resulting in a faster answer.

3.2 Colors

There are 12 (twelve) color options in the customization panel which allow you to set the color for an element.

Nr.	Name	Purpose
1	Accent 1	Background: tooltips, marked text, hover search, audio without album art
2	Accent 2	Hover Text: read more, gif attribution, navigation links, link post, answerer username, usernames, post info, more notes, controls, Text: focused search, song titles, deactivated, liked post icon, Border: focused search, navigation dropdown, footer links, footer dropdown

3.3 Selectors

There are 13 (thirteen) selectors which allow you to select a style for an element from a list of given options.

Nr.	Name	Purpose
1	Post Width	Set the width of posts. Only for single column layout.
2	Font Size	Global size of text.
3	Sans Font	Sans-serif font that is used for text when the toggle Serif Body is disabled.
4	Serif Font	Serif font that is used for text when the toggle Serif Body is enabled.
5	Title Font	Font for titles and quotes.
6	Code Font	Font for preformatted text.
7	Text Align	Global text alignment.
8	Title Align	Text alignment of post titles.
9	Quote Align	Text alignment of quotes.
10	Ordered List	Icon before ordered list items.
11	Unordered List	Icon before unordered list items.
12	Navlink Text Transform	Text transformation of navigation links.
13	Tooltip Text Transform	Text transformation of tooltips.

3.4 Toggles

There are 17 (seventeen) toggles in the customization panel which allow you to disable or enable the styles of elements or even the elements themselves.

Nr.	Name	Purpose	Default
1	Show Captions	Show or hide captions on the index.	Inactive
2	Show Tags	Show or hide tags on the index.	Active
3	Infinite Scroll	Use infinite scroll or pagination.	Active
4	Multiple Columns	Display multiple columns or just one.	Active
5	Three Columns	Display three columns or just two.	Inactive
6	Sans Serif Only	Override all fonts with Sans Font .	Inactive
7	Serif Body	Use a serif font for the body or replace with Sans Font .	Active
8	Serif Title	Use Title Font or override with Sans Font .	Active
9	Show Italic	Show italic text as slanted or unslanted.	Active
10	Colored Text	Show colored text as it is or override it with Text .	Inactive
11	Audio Border	Show a border around audio posts.	Active
12	Grayscale Effect	Apply a grayscale effect to images, videos, and audios.	Inactive
13	Custom Link [1-5]	Show or hide custom links in the navigation dropdown.	Active

3.5 Text Fields

There are 16 (sixteen) text fields in the customization panel, which allow you to assign a very specific value to an element.

Nr.	Name	Purpose
1	Photoset Gap	Gap between the individual images of a photoset. Enter a value in pixels, e.g. 4px.
2	Grayscale	Grayscale intensity, range [0% - 100%] or [0-1]. Only applied when Grayscale Effect is enabled.
3	Grayscale Hover	Grayscale intensity on hover, range [0% - 100%] or [0-1]. Only applied when Grayscale Effect is enabled.
4	Blur Strength	Strength of the background blur. Enter a value in pixels, e.g. 5px. Only applied when Lightbox Opacity or Navigation Opacity are <1 or <100%.
5	Lightbox Opacity	Opacity of the lightbox, navbar, and footer. Input ranges from 0-1 or 0-100%.
6	Navigation Opacity	Opacity of the navigation dropdown, hover link posts, answers, and footer dropdown. Input ranges from 0-1 or 0-100%.
7	Link [1-5]	Title of a custom link.
8	Custom URL [1-5]	URL of a custom link.
