Invitatio

n

How to download google fonts, so that I have lots more fonts to choose from.

<https://github.com/showcases/fonts>

<https://github.com/google/fonts>

In read me, it says download all Google Fonts in a main zip

Download.

Extract.

Within the folder extracted, in search, type in .tff

Select all that says: Type: TrueType font file
This is about almost everything except the bottom couple of files

.otf

After installation, close app and reopen it.
If that doesn't work, restart whole computer.

<https://github.com/pjobson/Microsoft-365-Fonts>

<https://archive.org/details/dafonts-free-v1>
