

Hello, my name is Ridley and I am an eighth-grade student. My advice for what to do when you come into eighth grade next year is not to be an idiot and mess around. Be focused on school and you have a good year. Don't mess around in classes like Mr. Jones's or Mrs. Rogers's because you won't be able to do fun things if you don't behave, work hard, and not make fun of others just because they are different. For Mr Jones's class, he wants you to do your work and stay focused. Mr. Jones like to have fun but you won't have fun if you don't do your job. You will have a good year in Mr. Jones's class if you act normally.

You should always make sure you have the materials you need. This year many people needed to remember a lot of materials like pencils, and paper, and to charge their computers. Your materials are very important so you should make sure you have them because you use pencils for most classes like math and ela or many other classes. They should charge their computers because it is the most important thing for this year. Be sure to have your materials for Mr. Jones's class because you will need most of the materials I listed. If you don't charge your computer Mr. Jones has loners but he would like you to return them near the end of class. So when you enter eighth grade next year make sure you have all the necessary materials.

Some things that you learn this year in social studies will be interesting. One thing you will learn is the history of America and how the different systems of government work or how the thirteen colonies came to be. You will learn how people from Asia got to the Americas by boat or the land bridge theory. Another thing you will learn is early civilizations in the Americas like Native Americans in the north or the Aztecs or Inca in the southern Americas. You will also learn about the discovery of the Americas and how it changed Europe. You will learn about some things in Europe like feudalism or how owning land in Europe worked. When you enter eighth grade you will learn about many historical topics throughout history.

In conclusion, this year of eighth grade will be great if you do what is listed above. You won't have a good year if you mess around and not be smart. You will have to work hard this year more than the other years before. You learn many things in Mr Jones's class that might interest you very much. In all you will have a great year at middle school.
