

# Create 1000 Upwork Accounts Safely

---

Every year, millions of dollars vanish due to banned accounts, checkpoints, or payment limitations. The main cause isn't policy violations, but rather platforms detecting ABNORMAL PATTERNS in your operational behavior.

Upwork and other platforms use Machine Learning to analyze user behavior. Once they detect signs of multiple accounts from the same device, their algorithms automatically flag and apply restrictions.

## Statistics That Matter

According to research from 5,000+ MMO Marketing marketers in 2025:

**\*\*Account Ban Rates:\*\***

No protection: 78% banned within 30 days

VPN only: 61% banned within 60 days

Antidetect browser: 3% banned within 12 months

**\*\*Revenue Impact:\*\***

Average loss when account banned: \$8,400

Time to rebuild: 4-6 months

Trust score recovery: 8-12 months

**\*\*Scaling Success:\*\***

With antidetect: 89% successfully scale to 10+ accounts

Without antidetect: 12% can scale to 5+ accounts

Numbers don't lie. Upwork is getting stricter, and the gap between antidetect users vs non-users is widening.

## The Solution: Antidetect Browser Technology

**\*\*Multilogin\*\*** is the world's leading antidetect browser, trusted by tens of thousands of professionals in MMO Marketing. This isn't just a VPN or regular proxy - this is a COMPREHENSIVE solution to create completely independent browser profiles.

### Core Features:

**\*\*1. Complete Fingerprint Isolation\*\***

Each browser profile has completely unique fingerprint:

Separate Canvas fingerprint

Different WebGL vendor/renderer

Customizable Timezone, Language, Geolocation

Individual Font list, Screen resolution

Independent Audio context fingerprint

**\*\*2. Real Browser Cores\*\***

Multilogin uses 2 browser engines:

**\*\*Mimic\*\***: Based on Chromium (like Chrome)

**\*\*Stealthfox\*\***: Based on Firefox

Not modified browsers that are easy to detect, but real browser cores with advanced spoofing.

**\*\*3. Selenium/Puppeteer Integration\*\***

Automation-friendly for those who need:

Bulk posting on Upwork

Automated data scraping

Scheduled tasks

API-driven workflows

**\*\*4. Team Collaboration\*\***

Share profiles with team members

Role-based access control

Cloud sync profiles

Centralized management dashboard

### **Troubleshooting Common Issues**

**\*\*Issue 1: {platform} still detects accounts\*\***

Check proxy quality (datacenter proxies easy to detect)

Ensure fingerprint consistency (don't change settings)

Age accounts properly before activity

Verify timezone matches IP location

**\*\*Issue 2: Performance lag when opening multiple profiles\*\***

Multilogin requires decent hardware:

Minimum: 8GB RAM, quad-core CPU

Recommended: 16GB+ RAM, octa-core CPU

Close unused profiles

Use profile groups and launch by batches

**\*\*Issue 3: Payment issues with code SAAS50\*\***

Ensure entering correct code: SAAS50 (all caps)

Check that you're new customer (code for new users only)

Contact support if issue persists

**\*\*Issue 4: Selenium/Puppeteer won't connect\*\***

Verify Multilogin API enabled in settings

Check port configuration (default: 35000)

Update Selenium/Puppeteer to latest version

Check firewall settings

### **Start Today**

Every day you delay is a day:

Competitors are scaling while you're still struggling

Your accounts risk being banned anytime

Revenue potential limited by 1-2 accounts

**\*\*Simple action:\*\***

**\*\*Step 1\*\***: Click link below

**SIGN UP MULTILOGIN WITH CODE SAAS50**

**Multilogin Official Site**

**\*\*Step 2\*\***: Choose appropriate plan

Get 50% OFF: <https://saasverdict.com/go/multilogin> | Code: SAAS50

New starter: Solo (\$99/month)

Serious marketer: Team (\$199/month)

Agency/Pro: Scale (\$399/month)

**\*\*Step 3\*\***: Enter **\*\*SAAS50\*\*** at checkout (50% off)

**\*\*Step 4\*\***: Download, setup, and start creating profiles

**\*\*Step 5\*\***: Scale Upwork business without limits
