Anti-fraud Payment System protects both sellers and buyers.

THE QUESTION IS HOW ?

Let's take for instance

SELLER A   sell a bag for #4000 but want the buyer to pay into her personal account first before shipping.

SELLER B   sell the same bag for #4000 but accept payment via Anti-fraud Payment System. It means seller B does not have access to your fund until the buyer receives the bag.

MY QUESTION TO YOU SELLERS ?

As a seller B, do you think "serious buyers" would still doubt your credibility or request for POD knowing fully that Anti-fraud Payment System protects both sellers and buyers.

THE RIGHT ANSWER is  NO - they won't doubt your credibility or request for POD.

I believe have been able to convince and not confuse you that Anti-fraud Payment System will help your products/services go viral, rapidly boost sales and get potential buyers.

It's also an advantage for new vendors/sellers to advertise their brand and skyrocket the guru's.
