-----Great Service is what we do -----

Want to:

Take the header and footer from this TEMPLATE document... and apply / replace the header and footer in ALL documents in a Google Drive folder.

The header and footer in THIS template document, is copied to all docs in Test Example Folder (it REPLACES the header and footer in these documents). In the image below, running the script would take the header and footer from this Template document and replace the header and footer in "Test Document 1" and "Test Document 2"

FOR OFFICE USE:

Printing custom footer
