Name Card Reflection

I used many of the tools including the rectangle tool, curving tool, stroke and fill tools, and many more. I traced the bitmap of the panther logo and used the text box to put my name in it. This is the second time I've done this project, so I was able to do most of it from memory. I was able to complete it the night before the second class because I was bored so I am currently ahead. I was able to help others with their projects after I finished.

For making the project, I had a few problems. First, the computer couldn't find the printer, so I restarted the laptop. Then, the Wifi didn't work so it took a while to finally get it to work. Then, it was fixed and everything from there worked fine. I accidentally printed it in a higher resolution so it took longer to print. Everything went well besides that.
