

Attendees:

1. Jinal
2. Laxman
3. Sneha
4. Malini
5. Swetha Bachugudem
6. Manjunath Bandi
7. Angshuman
8. Sravya
9. Bindu
10. Rakib
11. Romain

Talk Thread: <https://talk.openmrs.org/t/bahmni-pat-call-26-june-2019/23727>

Agenda:

1. Bahmni 0.92 release - Release Candidate
2. [Jinal] Enhanced UI for Appt Scheduling: [Enhancements to the UI for Appointment Scheduling](#)
3. [Jinal] Product Enhancements -
 - Translation support for Forms 2.0: [Form 2.0 translations are not carry forwarded to subsequent versions](#)
 - Edit Bed Tag - privileges changed & not documented in release notes
- 4.

Notes:

1. [Angshu]Bahmni 0.92 update
 - a. Ready with RC candidate and artefacts are out. Yet to post the talk thread for the same
 - b. Bahmni coalition members will provide help for QA
 - c. Requesting community to test the RC.
 - d. Tested most of the Odoo integration part.
 - e. Issues will be taken into excel sheet and planning to conduct bugbash in the following weeks
2. [Jinal] Enhanced UI for Appt Scheduling: Below are the few proposals for new appointment UI
 - a. Instead of popup to create/edit an appointment whole new screen will show up
 - b. Searching of a patient/provider field takes both text and will have auto populate option

- c. [Jinla] is Walk-in appointments feature used widely ?? [Angshu] yes, implementations usually use this feature as a load balancer.
- d. [Angshu] screen should be supported in a tablet, at least have 9 inch.
- e. Add pdf/links for the community people to review new appointments UI mockup

3. Product Enhancements -

- 1. [Jinal] Translation support for Forms 2.0: Talk thread -> [Form 2.0 translations are not carry forwarded to subsequent versions](#)
 - a. Fixed the issue in OCP implementation
- 2. [Jinal] Edit Bed Tag - privileges changed & not documented in release notes

4. Lib cache Issue

- Was due to reference to older WebServicesREST from a custom OMOD. (Current version 2.20). The module was also packaged along with the custom omod, rather than making it a "provided" dependency.

5. To build the bahmni-core module with latest webservices.rest omod (2.24.0), we need to have a temporary test case to make the build pass. Refer to JIRA card <https://bahmni.atlassian.net/browse/BAH-839> for more details.
