

### **Online learning opportunities:**

#### **1. Statistics:**

A new statistics series through Stanford's Professional Development Center. You can earn a Certificate in Medical Statistics by completing all three courses: <https://stanford.io/2Ha7BIb>. You can also earn CME credits. The courses are self-paced, and you can enroll at any time.

For more information:

Program webpage: <https://stanford.io/2Ha7BIb>

Introductory Webinar ("How to Be a Statistical Detective"): <https://stanford.io/31FSkIP>

#### **2. Writing:**

Writing in the Sciences continues to be available on Coursera:

<https://www.coursera.org/learn/sciwrite/>

It is free to access all the materials, including videos and practice exercises. Coursera only charges a fee for the certificate.

#### **3. Tools for educators and online learning (focus on Earth Sciences and Geosciences):**

<https://www.agu.org/learn-and-develop/learn/online-learning-exchange/online-learning-exchange-main-page>

<https://eos.org/agu-news/agus-online-learning-exchange-shares-education-resource>

#### **4. Online courses and seminars on human flourishing (FREE or low cost)**

<http://www.awakeningjoy.nfo>: Course combining lectures, interaction, and performance

[http://greatergood.berkeley.edu/news\\_events/event/the\\_science\\_of\\_happiness](http://greatergood.berkeley.edu/news_events/event/the_science_of_happiness)

<https://www.projecthappiness.com/get-involved/online-course>: Insights in positive psychology, neuroscience, mindfulness

<http://www.rickhanson.net/teching>: Foundations of Well-Being

### **Job posting:**

A job posting open for a remote science writer:

<https://www.dascena.com/careers/scientific-writer>

PhD preferred
