<table>
<thead>
<tr>
<th>Questions</th>
<th>Rating</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>The problem is well-defined. You can easily tell what the topic is, what specific problem is trying to be solved, and what kind of recommendation / prediction will be used to solve it.</td>
<td></td>
<td>The problem is deciding where to go on vacation</td>
</tr>
<tr>
<td>The data collected will help solve the problem. All necessary data need to make the recommendation or prediction is included in the survey.</td>
<td></td>
<td>At first the things didn't seem related, but when I saw the data, there were relationships</td>
</tr>
<tr>
<td>The data has been used to help solve the problem. Important relationships have been identified in the survey data.</td>
<td></td>
<td>I liked how ice cream meant that you probably liked the beach.</td>
</tr>
<tr>
<td>The way the data was used to create the algorithm was reasonable. The decision making algorithm clearly connects to the relationships found in the data.</td>
<td></td>
<td>I could tell where all the rules came from in the tables</td>
</tr>

Free Response Feedback

I like... The questions were really fun.

I wish... I wish the superpowers also had pictures.

What if... there were more pictures and maybe a color background to make it more exciting.
Creator's Reflection

1. What piece of feedback was most helpful to you? Why?

The part about pictures for the superpowers because I thought it was confusing, especially the pictures for invisible, but I guess people like pictures better than words.

2. What piece of feedback surprised you the most? Why?

That there should be a color background because I think that it makes it harder to see what the picture is. I think white is more professional.

3. Based on feedback, what changes will you make to your app proposal?

I will definitely add pictures for the superpowers.
