From: Dave Vetterick <veterick@ix.netcom.com>

[This is to comment on] Dr. Boylan reports on the contents of the book, which I found very interesting and exciting.

However, before getting further into it, I thought I'd check with well known author on Roswell and MJ-12, Stanton Friedman. His reply to me follows.

Any response regarding Mr. Friedman's comments should be directed to him and/or this list, and NOT me.

Dave Vetterick

July 28, 1997

Dear David;

Richard Boylan seems to believe everything without checking anything. As usual, he is off the wall. I did a lot of checking on Michael Wolf who had claimed a Ph.D. in Theoretical Physics from MIT, and an MD from McGill University; an unusual combination indeed if true. It isn't. I asked Mr. Courant, who had interviewed Michael Wolf (in the UK UFO Magazine) for his Thesis advisor's name at MIT. Michael (with whom I spoke several times several years ago) refused to give me the name on the basis that the advisor still did classified work, and couldn't have his identity revealed. Michael would give it when I wrote about my supposed black budget work on Nuclear rockets.

Obviously, every thesis has an advisor's name on it. I, never worked on any black budget programs. I HAVE written about nuclear rockets. I checked MIT's registrar, alumni, Physics Dept., and no one had ever heard of Michael Wolf Kruffaut, nor had McGill University. He did join the NY Academy of Sciences. However, anybody can if they're willing to lie about their credentials and pay the annual fee, which he did. The same goes for The American Association for the Advancement of Science. Both were joined in the 1990's. It seems strange for such a "prominent" scientist not to have joined these many years ago.

An Internet search by another researcher turned up more info from his relatives. Michael was never married, and didn't have any children, even though he tells a sad tale of an accident that killed his wife and child. He also spent time in a mental hospital. His residence address is the same as the New England Research Institute, a non real outfit.

Wolf's book is total science fiction. There is no Element 115, and Lazar's scheme won't work.

In short then, Michael is one of many frauds in ufology, like Robert Scott Lazar, William Spaulding, etc., ad nauseam.

Most Cordially,
Stan Friedman
