DATA AVAILABILITY STATEMENT

CommIT (Communication and Information Technology) Journal research data policy encourages or requires the provision of data availability statements. Some research funders require data availability statements to be included in publications. CommIT (Communication and Information Technology) Journal supports compliance with these requirements. Publicly available datasets referred to in data availability statements can also be cited in reference lists and this is particularly encouraged when datasets have Digital Object Identifiers (DOIs). Data availability statements commonly take one of the following forms. It is suggested to put your data in the repository (zenodo.org or figshare.com). **Please note that the suggested websites are public, so everyone can access your data.** If you cannot open your data, please give us the reason.

Kindly fill in the statement of data availability (choose the most suitable for your data):

No.	Availability of data	Statement
1	Data openly available in a public repository that issues datasets with DOIs	The data that support the findings of the research are openly available in **[repository name e.g "figshare"]** at **http://doi.org/ (include DOI)**, reference number **[reference number]**.
2	Data openly available in a public repository that does not issue DOIs	The data that support the findings of the research are openly available in **[repository name]** at **[URL]**, reference number **[reference number].**
3	Data derived from public domain resources	The data that support the findings of the research are available in **[repository name]** at **[URL/DOI]**, reference number **[reference number]**. These data were derived from the following resources available in the public domain: **[list resources and URLs]**
4	Data available within the article or its supplementary materials	The authors confirm that the data supporting the findings of the research are available within the article [and/or] its supplementary materials.
5	Data generated at a central, large-scale facility, available upon request	Raw data were generated at **[facility name]**. Derived data supporting the findings of the research are available from the corresponding author **[initials]** on request.
6	Embargo on data due to commercial restrictions	The data that support the findings will be available in **[repository name]** at **[URL / DOI link]** following a **[6 month]** embargo from the date of publication to allow for commercialization of research findings.
7	Data subject to third party restrictions	The data that support the findings of the research are available **[from] [third party].** Restrictions apply to the availability of these data, which were used under license for the research. Data are available **[from the authors / at URL]** with the permission of **[third party]**.

8	Data available on request from the authors	The data that support the findings of the research are available from the corresponding author, **[author initials]**, upon reasonable request. Explain the reason why the readers must request the data.
9	Data sharing not applicable – no new data generated	Data sharing is not applicable to this article as no new data were created or analyzed in the research.
10	Non-digital data available	Non-digital data supporting the research are curated at **[add location]**.
11	Data not available due to [ethical/legal/commercial] restrictions	Due to the nature of the research, due to **[ethical/legal/commercial]** supporting data is not available.
12	Data not available - participant consent	The participants of the research did not give written consent for their data to be shared publicly, so due to the sensitive nature of the research supporting data is not available.
