Hannah	1	Ryan Xu Franklin Feng Anthony Quach William Lin	Zero Hunger	<p>Build lemon stands everywhere and serve lemonade there for free. Force them to eat lemons. Only lemons. Nothing else. We plan on making breakfast lemon cereal, lunches, lemon salads, dinners, lemon burgers, and as a beverage, lemon juice, and lemon candy.</p> <p>Lemon stands are easy to make, they don't take up much space, and they serve delish.</p> <p>Have locals grow lemons, because they are an easy fruit to maintain. They can use lemons to make their food taste great, and sell them at the same time. They can sell the lemons for money, and use that money to buy food. We can have helpers sell lemons around the world, and bring the money back to the towns where they got</p>

the lemons from.

The locals can sell such high quality lemons that everyone will want lemons from them instead of the super markets, so they make more profit and can use the money to buy grain and resources that they need.

We can pay the helpers with free lemons.

The plan:

#1 in places with hungry people, we will bring lemon tree seeds to help them start to grow their own lemons.

#2 The use the lemons and turn it into lemonade

#3 we sell the lemonade around the world, and put a tag on itt that says; "Buy this lemonade to stop world hunger"

#4 We bring the money back to the people who are hungry and they can use it to buy the things they need.

"This is legit, it made me rich." -William Lin

"When life gives you lemons, end world hunger"

				-Franklin Feng 2021
	2	Justin Xu Steven Chen Matthew Liu	Life Below Water	Biodegradable plastics that include plastic bags and bottles made out of lemon that will dissolve after being in water for 20 minutes to save the ocean life that eat and gets stuck in harmful plastics.
	4	Ruth Mehreteab Gabriel Ohaegbu Collett Kinobe	Sustainable cities/communities	To provide low-income families a healthier and affordable alternative to lemonade aid (by using organic ingredients) while using recyclable and reusable materials. We will also be making an organic lemon cookie to go along with the lemonade.
Olivia	5	William Liao Sidhartha Roychowdhury Chandan Chakraverti Samarth Shukla	Feed the hungry	We will make the lemons we use for environmental work like putting the rest of the lemon in the soil of the Amazon rainforest where there is a lot of deforestation. After this the next plan is to put it in other places around the world with need of good soil for trees. We will use the donation from this program to feed the hungry and when we sell lemonade 5 % of the money we get from it will also go to the Feed the Hungry foundation.
	6	Deepika Bharwaj Anushri Pal Shriya Reddy Tiffany Xiao	Partnerships for a Goal	Partner with colleges to start on-campus lemonade stands that hire students to lessen college debt. The profits go towards research at state colleges. "To free students of financial insecurity and inspire them with advancement and creativity,"
	7	Cormac Patterson Advaith Rao Eli Leav	Decent work and economic growth	We Completely revolutionized the lemon and lemon related product business, creating a new industry and more jobs. "Lemons; More than just a plant"

Jessie	8	Victoria Regachuelo Fatema Merchant Annika Vednere	No poverty/ Zero hunger Climate Change	Selling lemon flavored baked goods, composting leftovers/scraps to sell to farmers. Half the price of the good gets given to charity, or some of the quantity the customer ordered gets given to people in need (customers choice from both) Victoria Regachuelo a ved
	9	Karen Schwartz William John Saaya Krishnan	Life On Land	Making Hot Lemonade for homeless shelters for them to stay warm. And take the leftover lemon seeds and replant them for more trees on earth.
	10	Ryon Das Surya Thoppae Madhav Girish	Quality Education	Create a lemonade stand in school cafeterias. The lemon-aid will have electrolytes, vitamins, and other things that will keep students energized and healthy. It will be free of charge to students, but schools will have to pay a decent subscription amount. We hope to use lemon-aid as a catalyst to spur student excellence and have smarter kids.
Ritvik	11	Nandini Garg Anika Mandloi Navya Kalusani Amulya Alladi	Good Health and Well-being	<ul style="list-style-type: none"> ●Soaps and Other Care <ul style="list-style-type: none"> ○Bath bombs Lemon based and scented lotions ○Bar soap ○Liquid soap ○Lemon scented candles ○Other Lemon based products lemon Body Products . I
	12	Kexin (Cathy) Wei Iniya Venkat Isha Manohar	Zero hunger and life on land	Sell food items (lemon meringue pies) and that helps ending hunger and some percent of the profit goes to another cause.

				Planting lemon trees can help with world hunger, climate, and some percent of the profit goes to another cause.
	13	Zachary Abramovich Angela Ilic Lucia Ilic	Responsible Production And Consumption, Life on Land, Climate Action, and Quality Education. These are all incorporated , however, the main one is Responsible Production and Consumption.	Biodegradable Lunch trays/cutlery/cups/utensils made from lemon rinds and pulp. This will help schools go green, and also spend less on products, and focus on tools for students and better education.
