

Log into Clever from Home

The North Kingstown School Dept. has implemented a single-sign-on (one username & password) process using Clever. Students can access frequently used digital classroom resources with their NKSD Google account credentials.

Families should [download and install the Chrome browser](#) to access their child's school account on their home devices. If they already use Chrome, they must [add a separate profile](#) for the student because NKSD has filters, policies, and other safeguards that follow school accounts. **Turn on Account Sync.**

1. Ask the teacher for the student's **NKSD Username & Password**.
2. Open the **Chrome browser** on the home device.
3. Follow these directions to **set up the student's profile** using the NKSD Username & Password: [Manage Chrome with multiple profiles](#)
4. **Turn ON Sync.**
5. This will open the **Clever page** in their account. They can choose Lexia, IXL, DreamBox, etc., from there, just like in the classroom. If the Clever page doesn't immediately open after setting up the profile, restart the **Chrome browser**.

Families should **switch out of the student's profile** when they need to do **personal work** on the computer. Only school-related activities should be done in the NKSD student profile.
