

Conan Exiles Mod Showcase - Exile Architect and More

05-02-2019

Mods showcased in today's stream are thanks to the efforts of the Author: Illspirit, [their workshop page can be found here](#)

- **There will be a Stream next week, as well as "cool stuff" coming for the 1 year Anniversary for Conan Exiles (12:44):**
 - The new dungeon and other content on testlive will be part of what's coming next week
 - They will try and have all platforms updated at the same time. However, due to certification on consoles, that might not happen.
- **New Mechanics (Mounts, etc)? (18:31)**
 - When Funcom feels they have something to share on requested features or new features, they will.
- **Turan DLC now available on XBOX (20:32):**
 - Year Two Season Pass (which includes the Turan DLC) is not yet out, it's still going through Microsoft Certification
- **Year 1 Bundle vs Year 2 Season Pass Clarification (23:31):**
 - Year 1 Bundle contains the first 4 DLC's released
 - Year 2 Season Pass starts with the Turan DLC, and rewards the purchaser with the next three DLC's that are not yet released.
- **Mod Showcase: Exile Architect (25:04):**
 - [Link is here for the mod.](#)
- **Player Suggests Funcom Focus Completely on Bug Fixing (33:07):**
 - Tascha goes on to explain that they have for many months focused on exclusively bug fixing (Jens later repeats this statement much later into the stream). And that it's time to switch gears and work on content along with continued efforts to fix bugs as they used to do.
 - Funcom won't stop working on bug fixing, but they are never going to make everybody happy.
- **Further Map Expansion? (38:42):**
 - As has been much discussed, no, further map expansion of the current map is not planned due to performance issues.
 - [Visit the Note Section of the Wiki link](#) to learn more if you want to.

- **Mod Showcase: Fence Gates (44:56):**
 - [Link is here for the mod](#)
- **Official Server Wipes? (46:36):**
 - Server Wipes for Official Servers have been given a firm no by Tascha. Funcom will not be wiping existing official servers, period.
- **Crossbows? (50:34):**
 - They were removed from the game because they couldn't get them to work right after the original combat revamp (~ April 2018).
 - They also will not be coming back at all
- **When will there be Treasure in the game? (52:22):**
 - There is treasure in the game.
 - Legendary Chests
 - Special Loot drops
 - Gold
 - Silver Coins
 - Random loot chests
 - There isn't something like jewelry that you sell to a merchant, if that is what the question referred to.
- **Why no visible Road Map? (53:16):**
 - Once a feature or potential content update has been talked about, it starts a clock with the community.
 - There are often delays or reasons something doesn't come out, and for some people this isn't acceptable in any shape or form.
 - Funcom's current strategy is then to only talk about something when it's nearly done.
- **Turan Rhino Conversion Fix? (1:00:16):**
 - It is intended that you be able to change your Greater Rhino and convert it into a Caravan Turan Rhino, thus gaining more carrying capacity but losing the Greater Rhino benefits.
 - They hope to introduce some sort of notification in the future so players know what is about to happen if they choose to convert.
- **Do a stream someday where they play online with other players? (1:02:15):**
 - Noted, it's a good suggestion.
 - They also like to visit private servers from time to time too.
- **Why does Turan Armor Grant Cold Protection? (1:02:46):**

- Jens said because that's how the designers designed it, which is true.
- But basically, people kept responding with feedback that they wanted more cold protection based armor, so that's why they did it even though Turan is a desert culture.
- **Conan Unconquered Stream soon? (1:05:28):**
 - Yes, no exact date but it will be before launch of Conan Unconquered.
 - For those unaware, [Conan Unconquered](#) is an upcoming Survival RTS, made by [Petroglyph](#) and Published by Funcom. Many of the developers are veterans of other games such as Command and Conquer.
- **Any News on the New Dune Game(s)? (1:05:51):**
 - No, all they will say is that they are working on a game from the Dune franchise.
- **Is the upcoming Witch Doctor Feat a DLC? (1:06:36):**
 - It is not a DLC but a free update once it's released (ETA is next week for the Anniversary).
- **Shoutout to Illspirit and all the modders for their hardwork (1:08:30):**
