[b]1. Bounty campaign will be managed by [b][url=https://t.me/Bounties]Bounty Detective[/url][/b].

2. [color=green]4,500,000 NOWL[/color] + [color=green]3 BNB[/color] (For video campaign) are to be divided according to the stakes accumulated amongst selected participants.

3. The bounty program was launched on 09/07/2021 and will run until 23/07/2021.

4. The reward distribution of Nowl Finance Bounty is guaranteed by Bounty Detective.

[color=red]Note:[/color][b] [i] The total reward pool's value is estimated and changeable; it is calculated based on the project's token sale prices.

Bounty rewards will be distributed to your BSC wallet until the end of August, 2021.[/i]

[color=red][b>Disclaimer:[/b][/color] By agreeing to participate in this bounty, you acknowledge that the wallet address and the email address you submitted are final and can't be changed.

Bounty Detective may perform additional reviews, including but not limited to requesting other documentation for analysis of your joined campaigns if needed.

Bounty Detective is under no obligation to send your bounty reward and may, at its discretion, cancel your participation from each ongoing

bounty if the participant does not follow the rules mentioned on this bounty thread.

Bounty Detective has no contribution to the token distribution; unless it announces the exact opposite on [\[url=https://t.me/Bounties\]group\[/url\]](https://t.me/Bounties) and [\[url=http://t.me/Bounty\]channel\[/url\]](http://t.me/Bounty). We are only responsible for the reward distribution of any campaign when we publish it, unless explicitly stated "Bounty Detective has escrowed and guarantees the reward distribution of this bounty."

The USD value of the bounty reward pool is estimated, and it might change regarding different factors. We usually announce the rewards by calculating their final token sale price if it is not listed on any exchange yet.

Our team has carefully researched the project following several criteria as we did for all of the campaigns we have managed or published. However, we can't assure the project's success as our duty is to provide a bounty management service for them as freelancers. We are responsible only for managing the campaign. We are not responsible for the project's success and continuity.

A crypto project has too many factors in reaching their targets. We are not in the team of any project and not their employees, and we can't guarantee the future progress of any project only because we manage their bounty as freelancers.

We encourage everyone to do their research and due diligence before investing their time or money. Participating in this bounty campaign or investing in it will be at your own risk.

Kind regards.
