Advance CAMP - Monday, Oct. 27, 2014, 1:30pm, Room 106

TOPIC:

CONVENER:

MAIN SCRIBE:

ADDITIONAL CONTRIBUTORS:

of ATTENDEES:

MAIN ISSUES DISCUSSED:

Use sp web module. you will get environment variables back. Groups and saml assertions show up as environment variables.

Get attributes into Shib.

Get CAS services changed, add new apps.

Ga Tech. we add data manually to CAS.

Nebraska only releases uid and name, so data is limited. Service URLs are wildcarded mostly. Shib is using uncommon metadata only.

Old Dominion. can make cas changes in midday, using Cisco load balancer. used to use DNS round robin. Others use load balancers also.

Anyone using Glu?

Anyone using a webform to capture data needed. get stewardship.

Nebraska. With directory type info, no stewardship permission needed.

Nebraska. was shib first and set up Cas for Ellucian products. all data definitions and release policies are in shib.

50 clients. grouped into some 20 categories, using regex a lot. Only 3 custom definitions, custom relying parties. Release of authorization data may or may not happen, depending on what they look like in ldap.

How many people have a fast path for some attributes.?

Nebraska,

What about apps that won't do CAS, what do you do?

Procurement office controls some of this for some schools. O365 will become native shibboleth. not ADFS. Can push back on vendor, to update.

Ask, Do you support SSO

Point them to Incommon affiliates page. Some of these are consultants. And this could be an incentive to the vendor - see how many people you could sell to, if you did SSO this way.

Ga Tech. form to collect info. https://www.iam.gatech.edu/gted/data_steward_request.html

This goes into a footprints ticket. then its manual for stewardship etc.

We manually add them to a dist list (could be automated)

Ideas: track them and use that for deprovisioning later?

Australian. Federation Registry. Jim F. for Aegis.

grails based. git hub. many idps and many sps, generates XML. workflows for approvals. attributes.

ACTIVITIES GOING FORWARD / NEXT STEPS:
