

Air midwest LTD (Airspace FTS)

SI3 How many Sky Knights can you mold yearly?

Hey Airspace FTS team,

You already have most of the tools to make this happen: an elite set of assets including the G115 Mohawk and the T-67 Firefly, together with your team of instructors always working to fit every students' individual needs.

All you're missing is a promotional asset, L3 HARRIS, CAE and CATS Aviation have been using for their success: a professional Instagram page.

Aspiring pilots are always on the lookout for a reliable pilot training company, and an instagram page will always convey this message by showing immaculate content related to the aviation instruction you provide.

Delaying this will only turn away potential customers to other venues, pushing revenue that could have been yours down the drain.

I have created a preview to show what you will be getting into, let me know if you're interested and I'll send it over.

Talk soon,

Nawees
