**NOT TESTED** - [UPDATER] Test over-the-air (OTA) updates from previous build (new)

**PASS** - [HOME SCREEN] Launch Homescreen, unlock keypad

**PASS** -[HOME SCREEN] Moving an application around the homescreen

- Notes: Dragging and dropping icons is a struggle - not very easy.
- I see text corruption when I move items around - Cost Control and Clock, for example

**PASS** - [DIALER] Making a call (& adjusting volume)

- Dialer never launched one time and I had to reboot the phone to get it to come back
- Sound quality seems to be good

**PASS** - [BLUETOOTH] Pair with a device

- Paired with a computer

**PASS** - [DIALER] Receive a call with vibration and sound (device locked)

- Got stuck in a screen and had to reboot phone when call was missed - have screenshot

**PASS** -[CALL LOG] Check the contents of the tabs All and Missed

**FAIL** -[CONTACTS] Add new contact filling all the fields

- Cannot add a picture - crashes the phone - known bug

**PASS** -[CONTACTS] Edit a contact changing the name and the phone number

- Note: When you forget to add a valid number of numbers for the phone number it doesn't save the number
- Deleting a contact caused UI corruption which blocks the search field

**PASS** -[CONTACTS] Send an sms from a contact detail

- Message layout a bit corrupted

**PASS** -[SMS] Receive a sms with vibration and sound (device unlocked) & confirm notification

- After clearing notifications I cannot dismiss the notifications screen. This might be a new bug.

**FAIL** [CAMERA] Take a picture with camera

- Performance often inconsistent, had to reboot phone as it would get stuck when positioning camera
- Graphical glitches present after snapping shutter
- In Portrait mode I often am presented with a blank screen that is black. Changing to landscape seems to correct the issue

**FAIL** - [CAMERA] Take a picture with camera from Lockscreen

**FAIL** - [CAMERA] Make a video recording

- Known bug - [https://bugzilla.mozilla.org/show\\_bug.cgi?id=796060](https://bugzilla.mozilla.org/show_bug.cgi?id=796060)
- Red record button gets left behind after switching back to camera

**FAIL** - [VIDEO] Play the video you recorded, check for video and sound

**PASS** [GALLERY] Browse photos in gallery

**PASS** - [GALLERY] View fullscreen picture, check orientation

**PASS** - [BROWSER] Load a website via Wifi

- Browser orientation is very bad on some sites and turning the phone

**PASS** - [BROWSER] Load a website via Cellular Data

- Had to fiddle with APN settings to get cellular data to work

**PASS** - [EMAIL] Send email via activesync

- Layout in Hotmail was very bad especially if you change phone orientation. Text got larger and smaller.
- Sending mail in GMail worked but I never got the mail sent from Hotmail (possible spam filter issue)

**PASS** - [[EMAIL] Send email via activesync

**PASS** -[SYSTEM] Power off - using long tap/power

**PASS** - [SYSTEM] Long tap Home button

**PASS** - [FM RADIO] Play a radio station

**PASS** - [MARKETPLACE] Marketplace - install market installed app

**PASS** - [HOMESCREEN] Marketplace - launch market installed app

- Note: Cannot sign into Twitter app since keyboard won't stay up
- I get stuck in Twitter app and have trouble getting out

**PASS** - [HOMESCREEN] Marketplace - delete market installed app

Other issues

- You often have to press apps/buttons/widgets **very hard** to get them to respond
- The first time I used the search in everything me, when I tried to add the Sprint Twitter app I crashed.
- Geolocation prompt seemed to keep coming up randomly during testing
